Independent Learning

Clinical Research Monitoring & Coordination

Graduate study course

Join the Quest
to
Develop
New Medicines

Learn & Apply
Good Clinical Practice

Target Audience:

Open to all life sciences majors, this course will give you a comprehensive understanding of all aspects of clinical trial conduct to meet FDA and ICH requirements.

Lessons:

You will learn formal and practical aspects of being a successful clinical trial monitor or study coordinator. Review case studies in realistic job function exercises to prepare for real world application.

Accreditation:

ANCC accredited for 33 CEUs.

Immaculata University Graduate Certificate to enhance your resume

There are rewards of working in Clinical Research!

- Help patients improve their well-being
- Join fast growing Bio-tech to treat disease
- Discover new therapies
- Save lives

A Flexible Solution to meet your Education and Career goals....

There are over 100,000 clinical trials world-wide being conducted by bio-pharmaceutical companies.

This course will help you to join the wide range of trained professionals who help prove the safety and efficacy of new drugs.

Course Highlights:

- ✚ Gain insight to roles and opportunities in Clinical Research.
- ✚ Understand the latest Good Clinical Practices as applied to medical research.
- ✚ Identify product adverse effects and proper reporting requirements.
- ✚ Identify ethical issues in clinical research.
- ✚ Institute and obtain proper Informed Consent
- ✚ Learn to employ efficient and appropriate study subject recruitment methods.
- ✚ Develop qualifications sought by the Pharmaceutical, Biotech & Medical Device industries.

**GAIN CRITICAL INSIGHT TO HELP PATIENTS, ASSIST RESEARCHERS & FIGHT DISEASE
ENHANCE YOUR CAREER, OPEN DOORS AND PROMOTE A NEW DISCIPLINE**

Job search assistance is available upon completion, including resume review, job listings and recruiter introductions. Immaculata University partners with Applied Quality Solutions to provide this course.

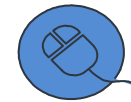

GOOD CLINICAL PRACTICES

Good Clinical Practices are the specific requirements you must learn to conduct a clinical trial. These standards are integrated into 10 easy to understand chapters with examples and case studies.

PC LEARNING & 24/7 Support

Lectures come on a CD-ROM. You watch them at your convenience, read the textbook chapters, complete the exercises and take the exams. If you have questions, support is available via email or telephone.
