| | <input type="checkbox"/> MUT 690: Culminating Proj MT (3) | |

**MUT 530, 532, and/or 534 (Music Skills for Therapy: Piano, Guitar, and/or Voice) are taken during the first year of study, in any combination according to student needs (i.e., by advisement)*

***Prerequisite is a course in statistics*

****Prerequisite is a course in human anatomy*

*****In cases of a part-time Music Therapy Internship, MUT 523 (2 credits) would be taken in summer of the second year of study; MUT 610 and MUT 630 would not be taken until after this semester; program would extend to include summer of the third year of study*

******Total of 3 credits must be taken in MUT 630*

******Optionally (in cases wherein a extension of the program is required, or wherein a more even course load is preferred), GEN 600, MUT 599, and MUT 690 may be taken in summer of third year of study*

In Addition: A total of 2 credits of electives are required, if not already satisfied in previous semester(s) (e.g., through 2 credits worth of: 530, 532, and/or 534; expressive arts courses; etc.)

Recommendation: In "Summer 0" (semester just prior to Fall I), take any necessary prerequisite courses (Human Anatomy, Statistics) plus any GEN or PSYC courses in the curriculum available over the summer...this will render the overall program 3 years (9 semesters, versus 8) in length, but will help lighten future semesters.
