

# **Course Listing**

Course	Credits	Title
ACC 200	1 TO 3	Special Topics in Accounting
Description:	Current topics dealing with ongoing facets of accounting.	
ACC 201	3	Accounting & Budgeting
Description:	business transactions, prep	ng information and the basic accounting cycle. Techniques of accounting fo baration and interpretation of financial statements for internal control and use in making sound business decisions, forecasting and budgeting method ACC 203 or 204.
ACC 203	3	Accounting Principles I
Description:		g of basic principles and procedures of accounting including account definition reparation, and generation of financial statements.
ACC 204	3	Accounting Principles II
Description:	Develops an understanding of basic principles and procedures of accounting including account definition classification, worksheet preparation, and generation of financial statements. This is a continuation of ACC 203. (Prerequisite: ACC 203)	
ACC 205	3	Financial Accounting
Description:	Focus on the financial aspects of accounting, financial statements, and applications. Emphasis is placed on three forms of business organization	
ACC 206	3	Managerial Accounting
Description:	Introduces concepts in analyzing and interpreting accounting information in product and service costing and the application of this information and statements in management planning, control, and decision- making	
ACC 303	3	Intermediate Accounting I
Description:	Comprehensive review of statements analysis. (Prerequisite: ACC 204)	accounting principles with detailed study of balance sheets; accounting
ACC 304	3	Intermediate Accounting II
Description:	Comprehensive review of accounting principles with detailed study of balance sheets; accounting statements analysis. This is a continuation of ACC 303. (Prerequisite: ACC 303)	
ACC 305	3	Intermediate Accounting III
Description:	Includes in-depth coverage of selected accounting topics, including, but not limited to, deferred income taxes, accounting for pension costs, cash flow statements, capitalized leases, and financial statements analysis. (Prerequisite: ACC 304)	
ACC 313	3	Income Tax Planning Ind & Bus
Description:	This course reviews federal tax law and explains income tax fundamentals for individuals, businesses, and trusts and estates. Topics include income tax fundamentals, AMT, tax reduction techniques, property transactions and passive activity, and charitable contributions and deductions. Prerequisite:	

Course	Credits	Title

	ACC 204
ACC 314	3 Advanced Taxes
Description:	Tax problems of partnerships, corporations, estates, trusts, deferred payments, gifts, with particular emphasis on tax planning and the role of the accountant. (Prerequisite: ACC 313)
ACC 317	3 Cost Accounting I
Description:	Basic cost accounting principles applied to job order, process, and standard cost systems. (Prerequisite: ACC 204)
ACC 318	3 Advanced Cost Accounting
Description:	Advanced cost techniques and theories, financial planning and control; profit planning with direct costing; flexible budgets, break-even and profit-volume relationships. (Prerequisite: ACC 317)
ACC 321	3 Internal Auditing
Description:	An introduction to internal auditing, its rapid growth and important role in the modern corporation. Topics include internal auditing standards, scope, responsibilities, ethics, the impact of the Sarbanes- Oxley Act of 2002, internal controls, techniques, and reporting practices. There will be some consideration given to the material included in the Certified Internal Auditor examination. Various techniques will be used to study internal auditing theory and practice which may include the use of problem sets and case studies. (Prerequisites: ACC 201 and 204, or ACC 206)
ACC 326	3 Proc Design & Internal Audit
Description:	The course covers the design of business processes and the implementation of key control concepts. The course utilizes a case study approach that will address tactical, strategic, systems, and operational areas. A study of the control aspects of accounting systems. Topics include: setting standards; defining and imposing administrative, operational, and security controls; and judging cost-effectiveness of systems. This is the first course leading to endorsed internal audit certificate and will prepare students planning on sitting for the Certified Internal Auditor Exam. (Prerequisite: ACC 201 or 203-204, ACC 321)
ACC 334	3 Forensic Accounting
Description:	This course will include a study of techniques used in solving financial crimes including: interviewing techniques, rules of evidence, and sources of information, forensic accounting procedures and current issues in financial investigations. The course will include the criminal statutes related to financial crimes. Case studies will be used to discuss interviewing techniques and other indirect methods of proof in resolving financial crimes. Various financial documents and instruments will be discussed and reviewed as part of the documentary evidence to support financial investigations. (Prerequisite: ACC 201 or 204)
ACC 398	3 Accounting Practicum
Description:	This culminating course prepares students for the real challenges of working in the field of accounting. An internship experience will provide an opportunity to combine actual field experience with classroom knowledge in an area of special interest. The course also provides the opportunity to re-examine learning objectives at the program level. (Instructor permission required)
ACC 399	3 Accounting Practicum
Description:	This culminating course prepares students for the real challenges of working in the field of accounting. An internship experience will provide an opportunity to combine actual field experience with classroom knowledge in an area of special interest. The course also provides the opportunity to re-examine learning objectives at the program level. (Instructor permission required)

Course	Credits	Title
ACC 401	1 TO 6	Independent Study & Research
Description:	Provides an opportunity for phase of the major field.	a junior or senior to engage in independent study and research in a specific
ACC 421	3	Advanced Accounting I
Description:		relating to business combinations, equity and cost methods of accounting, es, accounting for intercompany indebtedness, inventory transactions and ACC 304)
ACC 422	3	Advanced Accounting II
Description:	segment reporting, interim r	accounting including partnership accounting, foreign currency transactions, eporting, governmental accounting, accounting for non-profit organizations eporting Standards. (Prerequisite: ACC304) (Fee applies)
ACC 425	3	Auditing
Description:		standards employed in the verification of financial statements, evaluation of ampling, procedural testing, and moral and legal responsibilities of the 303)
AHS 100	1	Allied Health Seminar I
Description:	curriculum and to the allied Students are coached on pro assignments. Guest speaker	or courses/seminars for Allied Health majors. Students are oriented to the health disciplines, including the collaboration with partner institutions. ofessional preparation in anticipation of applying for their clinical is present other topics and students attend selected University and outside overed each time the course is offered.
AHS 200	1	Allied Health Seminar II
Description:	this course are required to e with partner institutions. Stu for their clinical assignments	the series of major courses/seminars for Allied Health majors. Students in explore selection of their specialization in anticipation of the collaboration dents will be coached on professional preparation in anticipation of applying as As part of the course, students will be required to complete volunteer . Special topics will be covered each time the course is offered.
AHS 300	1	Allied Health Seminar III
Description:	investigation of their chosen with partner institutions. Stu assignments. Guest speaker	jor courses/seminars for Allied Health majors. Students will deepen their specialization and prepare their application/placement for clinical training dents are coached on professional preparation in anticipation of their clinical s present other topics and students attend selected University and outside ction with their chosen specialization. (Prerequisite: AHS 200)
AHS 404	3	Capstone Professional HIth Sci
Description:	the liberal arts core, to deep	examine their experience in professional health care settings, integrating on their investigation into their career paths. Students are coached on I will complete pares and presentations. (Prerequisite: with instructor
ARA 101	3	Elementary Arabic I
Description:	in basic skills of listening, sp	l written modern standard Arabic (Fusha) including proficiency development eaking, reading, and writing. This form of Arabic is universally understood ing world and used in Islamic practice.

Course	Credits	Title
ARA 102	3	Elementary Arabic II
Description:		entals of spoken and written modern standard Arabic (Fusha) including basic skills of listening, speaking, reading, and writing. (Prerequisite: ARA )
ARA 201	3	Adv Intermediate Arabic I
Description:	cultures of the Arabic-speak	Arabic language, syntax, and grammar with materials selected for exploring ing world. Emphasis on development of student autonomy in Arabic, rriting. Laboratory work required. (Prerequisite: ARA 102 or instructor's
ARA 202	3	Adv Intermediate Arabic II
Description:	exploring cultures of the Ara	Arabic language, syntax, and grammar with materials selected for bic-speaking world. Emphasis on development of student autonomy in g and writing. Laboratory work required. (Prerequisite: ARA 201 or
ART 102	3	Basic Drawing
Description:		ed to explore the elements of drawing. Students experience exercises in awing using various media: pencil, ink, charcoal, and pastel. (Fee applies)
ART 105	3	Intro to Creating Computer Art
Description:	technological equipment. Tin Adobe Photoshop, and conce integrate the use of scanner and principles of design. Prio challenged to integrate these	s to create art and original graphics using computer software and ne spent in this course will be divided among learning Adobe Illustrator, epts of fine art and digital photography. Projects will be designed to s, digital drawing tablets, cameras and iPads while learning the elements or drawing experience is helpful but not necessary. Students will also be e skills with traditional art media such as drawing and collage. Students lop skills to apply in making flyers, posters, logos, and design. (Lab work
ART 200	1 TO 3	Special Topics
Description:	Several on-site guided muse various themes.	eum tours and hands-on workshops in the visual arts will be offered on
ART 201	3	Foundatns Visual Art & Design
Description:	This course will provide students with a foundation in the visual arts and design. This course enables students to develop and understand visual literacy by learning to apply the elements and principles of art and design through hands-on experiences using a variety of media and subject matter. Students will develop design thinking skills to create 2- and 3-D works of art. This is the foundation course for students to pursue fields within the Visual Arts in the disciplines of Fine Arts, Graphic Design or Art History. (Fee applies)	
ART 202	3	Anatomy Drawing:Figure it Out!
Description:	How do these parts work too relate to the human body. I	ing to rely on your own observations. What constitutes the human body? gether to make us "us"? This course allows you to observe, understand, and t will center on anatomical drawings, which will be helpful for students in cience, physical therapy, and allied health.
ART 204	3	Typography
Description:	addition to an introduction to students will focus on the ex	type-face as one of the primary elements of visual communication. In the history, terminology and technical issues related to typography, pressive characteristics of letterforms, fundamental typographic theories tion. Lab work required. (Fee applies)

Course	Credits	Title
ART 205	3	Drawing II
Description:		ving as an important form of visual expression and communication. The ication of fundamental drawing skills toward more personally expressive 2) (Fee applies)
ART 208	3	Art History I
Description:	masterpieces of sculpture, c of humankind. A broad rang perspectives on how people	the Paleolithic to the Gothic period, exploring major monuments and ceramics, architecture and painting as each form relates to the achievements is of cultures will be explored to provide an understanding of different have communicated visually though art forms. This course introduces art oster an appreciation for the visual arts.
ART 209	3	Fundamentals of Ceramics
Description:	fundamentals of constructing week the instructor will provinclude examples as well as home. Students will explore work from Ancient Greece, building is introduced along course will explore pinch, co development and an explore	tic course that develops pottery-making skills. Students learn the g clay objects using air drying clay and employ basic ceramic tools. Each ride a video of how to do the weekly technique and talk about the topic and other virtual references. Students can produce all the works right in their cultural and historical developments in ceramics. Students explore ceramic Native American Pueblo's and Japan. Each week a new technique in hand with examples from a variety of ceramic artist throughout the world. The oil, and slab building ceramic techniques. This course helps foster creative ation of how to create a three - dimensional form. Students will keep a reflection of the process of creating their ceramic work and include
ART 210	3	Sculptural Ceramics
Description:	employ fundamental hand b	tigate the use of water-based clay in creating sculptural forms. Students will uilding and wheel throwing techniques and explore the use of form, space 3-dimensional forms. (Fee applies)
ART 211	3	WI: Art History II
Description:	exploring major monuments form relates to the achiever	istory of arts from Fourteenth Century Art in Europe to Post Modernism, and masterpieces of sculpture, ceramics, architecture and painting as each nents of humankind. A broad range of cultures will be examined to provide at perspectives on how people have communicated visually though art
ART 215	3	Art Appreciation
Description:	design that underlie all work through hands-on projects, themes, purposes, vocabula	mentals of art through the analysis of the visual elements and principles of as of art. Students will discern an art work's subject matter and content lecture, writing assignments and class discussions. Students will explore ry and different media to expand their understanding and provide a deeper d the creative process involved.
ART 216	3	Art Abroad
Description:	historical sites, lectures, dis	ester break to Europe. The tour will consist of guided visits to art museums, cussions and a taste of the culture to enhance your appreciation of the arts. ded to the course fee that covers air, hotels, food, tours, transfer and a full
ART 217	3	Women Artists
Description:	will examine contributions w artworks created by women	provention of women artists from the Renaissance to the twenty-first century and oomen artists have made in the western art tradition. A broad range of will be explored for their historical, social, political and personal content. or movements within art history by examining the contribution of women

\_\_\_\_\_

Course	Credits Title
ART 218	3 American Art
Description:	An overview of the visual arts in the United States. This course will cover the principal movements and trends in architecture, painting, and sculpture in American art from colonial to modern times.
ART 219	3 Big Four Art Tour
Description:	Tours and lectures will be provided at each museum to look at art from a variety of views, collections, themes, history and medium of creation. Students will be introduced to how collections of art are formed and will learn about the four museums in Philadelphia. Students will be introduced to the works around the Impressionist period and compare how they are viewed in each museum. Students will experiment working with graphite, charcoal, watercolor and acrylics/gouache, and will become familiar with a variety of techniques for drawing and painting outdoors. Students will learn the basic elements of color mixing, composition, and spatial relationships, as well as how to investigate and analyze the effects of light and atmosphere in the landscape. No previous fine arts experience is required.
ART 220	3 Art and Mindfulness
Description:	Learn about mindfulness and the use of art to engage in the benefits and practice of being in the present moment, mindfully. This course will help you in: Learning techniques to reduce stress, improve attention, enhance well-being, deepen empathy, and bring awareness to the present moment; Understanding the interplay of mind and body for being focused in the creative process; Using one's breath to develop awareness of focus, concentration, and peace of mind; Activating different parts of the brain.
ART 301	3 Study Travel
Description:	Study/travel immersion course to France conducted in English. Attendance in scheduled on campus classes, participation in Study Abroad travel event, and completion of final paper required to receive credit. Limited enrollment. Travel costs additional.
ART 302	3 Graphic Design I
Description:	Various aspects of graphic communication through the use of typography, photography, layout and general graphic techniques will be presented. Students will be encouraged to develop creative, original and conceptual ideas for solving communications problems utilizing professional studio practices and procedures.Lab work required. (Fee applies)
ART 303	3 Painting I
Description:	A basic studio course designed to explore the elements of painting. Gradual experimentation with various media and techniques applied to studies in still life, landscape, and life. (Fee applies)
ART 306	3 Ceramics I
Description:	This studio course develops pottery-making skills. The students experience the fundamentals of constructing clay objects, glazing, and firing hand-built ceramic ware. (Fee applies)
ART 307	3 Potter's WhI &Hand Bldg Skills
Description:	This course develops the basic skills of pottery and provides an opportunity to develop the techniques of throwing pots on the potter's well. (Fee applies)
ART 308	3 Interior Design
Description:	A study of the fundamentals of design as applied to the home. Development of living units to meet varied psychological, economic, and spatial needs during the life cycle.
ART 311	3 Graphic Design II
Description:	This course will emphasize the observation and analysis of natural and man-made objects. This will lead

Course	Credits	Title

students to create formulized graphic interpretations, developing images with correlation of text and their use with consideration for processes of reproduction. Studies outlined in ART 302 will continue with emphasis on the expressive possibilities of lettering and typography. Lab work required. (Prerequisite ART 302) (Fee applies)

- ART 319 3 Sculpture I
- Description: The oldest form of visual expression, the three-dimensional image, will be explored. Form, space, mass, and light will be studied through the making of representational and abstract configurations. The vehicle of expression is hollowed-out clay which will be fired to create permanent sculptures. (Fee applies)
- ART 401 1 TO 3 Independent Art Studies
- Description: This course involves the development of a special project with the permission and under the direction of a member of the department. (Fee applies)
- ART 403 3 Painting II
- Description: This studio course is designed to further develop the basics of painting and to apply these techniques to studies of still life, landscapes, and portraits. This course encourages application of fundamental painting skills toward more personally creative and expressive goals. (Prerequisite: ART 303) (Fee applies)
- ART 419 3 Sculpture II
- Description: This course provides students with the opportunity to learn the direct stone/wood carving technique. (Prerequisite: ART 319) (Fee applies)

#### ATEP 201 3 Foundations in Athletic Trng

- Description: The fundamentals of athletic training, including the history, purpose, and professional standards of the National Athletic Trainers' Association (NATA). Introduction to the educational curriculum standards, career options, professional ethics and professional responsibilities as well as medical terminology and legal concepts as related to athletic training. Basic first aid and CPR/AED skills will be introduced. (Successful completion of this course is required for admission into the Athletic Training program.)
- ATEP 202 2 Fundamental Skills Athl Trng
- Description: Introduction to the foundational skill sets necessary to function at a proficient level at each clinical site. Techniques, principles, and theory will focus on developing essential cognitive and psychomotor competencies and proficiencies used in athletic training. Skill sets include but are not limited to: fitting of protective equipment, protective padding/splint fabrication, taping and wrapping skills, and modality application.
- ATEP 210 2 Clinical I
- Description: Course includes both didactic and experiential learning. Students will be assigned to assist the preceptors on campus or at an affiliated site with various sport assignments for a minimum of 100 hours. Focus of this clinical will be to understand the daily responsibilities of the certified athletic trainer and be introduced to the procedures for preventing, recognizing, evaluating, and treating athletic injuries and illnesses. (Athletic Training majors only)
- ATEP 301 0 OR 3 WI:Lower Extremity Evaluation
- Description: Introduction to procedures and tests used to examine and diagnose injuries of the lower extremities and spine. Students will be able to identify risk factors for musculoskeletal injuries and be instructed in theory and proper techniques for diagnostic and special tests, including neurological, strength and range of motion assessment. (Prerequisite BIOL 209-210) 2 hours lecture, 2 hours laboratory

Course	Credits	Title
ATEP 302	0 OR 3	Upper Extremity Evaluation
Description:	chest and head. Students wil and be instructed in theory a	es and tests used to examine and diagnose injuries of the upper extremity, I be able to identify risk factors for musculoskeletal injuries and illnesses nd proper techniques for diagnostic and special tests, including nge of motion assessment. (Prerequisite BIOL 209-210) 2 hours lecture, 2
ATEP 303	0 OR 3	Therapeutic Exercise
Description:	Introduction to various rehab	es and rehabilitation used in the treatment of athletic injuries and illness. ilitation protocols stressing the importance of safe progression and body ontraindications for exercises are thoroughly examined. (Prerequisite BIOL hours laboratory
ATEP 304	0 OR 3	WI: Therapeutic Modalities
Description:	illnesses. An introduction to t students' understanding of w an understanding of the hum	d implementation of therapeutic modalities used to treat injuries and he physical, chemical, and mechanical modalities will complement the ound healing and their purpose in the treatment protocol. Students will gain an body's physiological response to various treatment methods. 2 hours lecture, 2 hours laborator
ATEP 305	3	Athletic Trng Administration
Description:		ative policies and procedures related to state licensure, national ation, legal concerns, and athletic training department staffing, budgeting, record keeping.
ATEP 306	3	Pharmacology and Pathology
Description:	Examination of how illnesses and pharmacological agents effect body functions, including the cardiorespiratory and musculoskeletal systems. Focus will be on common illnesses and diseases that strike the physically active population, as well as common medications prescribed to physically active individuals. The ethical dilemmas and legal ramifications surrounding the use of recreational drugs and performance enhancing drugs will also be discussed.	
ATEP 310	3	Clinical II
Description:	hours working with a precept will focus on student understa	and experiential learning. Students are assigned to a minimum of 150 for either on campus or an affiliated site. The didactic portion of the course anding of methods used to assess and treat upper and lower extremity al I, Athletic Training majors only)
ATEP 311	3	Clinical III
Description:	hours working with a precept focuses on student understar	and experiential learning. Students are assigned to a minimum of 150 cor either on campus or an affiliated site. The didactic portion of the course ading of methods used to assess and treat upper and lower extremity cal I & II, Athletic Training majors only)
ATEP 312	3	Athletic Training Practicum
Description:	Students will be assigned to a experience students will be e emergency first aid skills, an	designed to provide students with experiences in athletic training. one or more of the institution's clinical education sites. During this xposed to the day-to-day routine of athletic trainers, while assisting with d practicing basic athletic training techniques. Weekly seminar meetings heir classroom knowledge and practical experiences.
ATEP 401	3	Introduction to Research
Description:		earch introducing the students to research design, problem selection, arch methodology. Students will develop their own research question for

Course	Credits	Title

intensive study and proceed through the various steps of the research proposal process. (Prerequisite: PSY 208)

#### ATEP 403 3 Athletic Training Seminar

- Description: Focus on current issues in athletic training. Students learn to become critical reflectors of published research and present their completed research projects at a department symposium. Students receive assistance in preparation for the National Athletic Trainers' Association Board of Certification (BOC) exam. (Prerequisites: ATEP 401, Athletic Training majors only, senior status)
- ATEP 410 3 Clinical IV
- Description: Focus is mainly on experiential learning in the athletic setting. Students will be assigned to a minimum of 200 hours working with a preceptor either on campus or an affiliated site. Students will also complete a didactic portion of the course to discuss issues related to these experiences, especially bringing classroom theory to practice. (Prerequisites: Clinical I, II & III, Athletic Training majors only)
- ATEP 411 3 Clinical V
- Description: Focus is mainly on experiential learning in the athletic setting. Students will be assigned to a minimum of 200 hours working with an ACI either on campus or an affiliated site. Students will also complete a didactic portion of the course that will focus on development as a professional in the field of athletic training. (Prerequisites: Clinical II, III, & IV, Athletic Training majors only)

## BIOL 100 0 OR 1 Intro to Biological Techniques

- Description: An introduction to the scientific method as well as the basic tools of modern biology from the microscope to gel electrophoresis. Designed for students who have completed a non-laboratory science course but need a laboratory component to fulfill core requirement. 2-hour laboratory
- BIOL 101 0 OR 1 Intro to Biological Techniques
- Description: An introduction to the scientific method as well as the basic tools of modern biology from the microscope to gel electrophoresis. Designed for students who have completed a non-laboratory science course but need a laboratory component to fulfill core requirement. 2-hour laboratory
- BIOL 103 0 OR 3 Human Biology & Ecology
- Description: Designed for students who have little science background or for students who want to increase their science knowledge. Case studies and interactive learning are used to present an overview of the body systems with an emphasis on current and practical knowledge of human anatomy and its functions. Students will research specific disorders and diseases as well as appropriate treatments. Also included is an understanding of the basic ecological interrelationships between man and the natural world. Students will analyze current ecological issues including invasive species, climate change, pollution and other environmental concerns. 2 hours lecture, 2 hours laboratory

#### BIOL 104 0 OR 3 Cell Biology & Genetics

Description: Designed for those interested in the health sciences, this course includes the principles of cellular life: the chemistry, the structure, and the energetics of the cell as well as the principles of inheritance: cell division, chromosomes, human heredity, DNA structure and function, protein synthesis, recombinant DNA and genetic engineering. Laboratory activities will complement these topics. 2 hours lecture, 2 hours laboratory

## BIOL 111 3 Introduction to Human Diseases

Description: Designed for students with little or no science background, this online course provides an overview of various communicable diseases. The biological basis, mode of transmission, and treatments will be

Course	Credits	Title

discussed as well as strategies for prevention and containment. The laboratory combines experimental and clinical investigations of several types of disease causing agents. 2 hours lecture, 2 hours laboratory

## BIOL 112 3 Human Ecology

Description: This online course is designed for students with no science background who wish to better understand current environmental problems and issues. Through use of online discussions, short essays, and laboratory reports, students examine and analyze the intricacies of current environmental issues on a local, regional and global basis. This course requires considerable independent thought, critical reading and thinking, and an interest in current environmental problems. 2 hours lecture, 2 hours laboratory. Students enrolling in BIOL112 cannot enroll in BIOL113.

## BIOL 113 0 OR 3 Environmental Science

Description: An introduction to environmental problems designed for students with no science background. This course presents an overview of current environmental issues with an emphasis on understanding the cause-effect relationships inherent in many of the environmental challenges we face today. Emphasis is placed on use of case studies, class discussions, laboratory investigations, and student presentations to study and analyze the issues. This course is engaging, but a serious course that requires considerable critical reading, an innate interest in the subject, and self-discipline to attend all the lectures and laboratories to do well. Business students are encouraged to learn concepts that can be applied to many current environmental fields. 2 hours lecture, 2 hours laboratory. Students enrolling in BIOL113 cannot enroll in BIOL112.

#### BIOL 115 0 OR 3 Biotechnology

Description: Designed for students in business and those interested in the modern-day applications and controversies of biotechnology. This course will identify and explain the multi-step process of recombinant DNA technology and expression of a protein product and develop a business plan for its marketing. This course will also investigate biotech stocks and the use of bio-organisms as producers of energy. (Fulfills a core requirement) 2 hours of lecture, 2 hours of laboratory.

#### BIOL 204 0 OR 3 Microbiology for Food Science

- Description: Introduction to the basic principles of microbiology for students interested in the allied health professions, nutrition and food service management fields. This course is designed to provide a solid working knowledge of microorganisms and their relation to food, sanitation, health, and industry. 2 hours lecture, 2 hours laboratory
- BIOL 205 0 OR 3 Human Genetics
- Description: A study of basic human genetics with a primary focus on gene transmission from generation to generation. Topics covered include human reproduction, gene transmission, biotechnology, epigenetics and genetic testing as well as basic gene expression. Laboratory will focus on classical genetics, molecular genetics and biotechnology to illustrate the rapidly advancing field of experimental genetics. 2 hours lecture, 2 hours laboratory

#### BIOL 207 0 OR 3 Human Biology

- Description: An introduction to the anatomy and physiology of the human body. All systems of the body will be considered with an emphasis on normal anatomy and physiology. 2 hours lecture and 2 hours laboratory
- BIOL 208 0 OR 4 Microbiology for Health Sci
- Description: An exploration of the structure and function of microorganisms as they relate to the economy of nature; the role of pathogens in human disease; and methods of prevention of contamination. 3 hours lecture, 2 hours laboratory

Course	Credits	Title
BIOL 209	0 OR 4	Human Anatomy & Physiology I
Description:	backbone of our modern und	pcess, at the cell, organ, and system levels of organization, which are the lerstanding of the functioning human body; covers integumentary, skeletal, ms. 3 hours lecture, 2 hours laboratory
BIOL 210	0 OR 4	Human Anatomy & Physiology II
Description:		vers cardiovascular, immune, respiratory, digestive, urinary, reproductive, requisite: 209 or permission of instructor) 3 hours lecture, 2 hours
BIOL 233	0 OR 4	Cell Biology
Description:	biology. Laboratory explores	biochemical processes to provide a foundation for advanced work in basic biological functions such as respiration, enzymatic digestion, cell - or co- requisites: CHE103, MATH207 or 301; or permission of instructor) 3 tory
BIOL 234	0 OR 4	Genetics
Description:	molecular genetics. Topics co DNA, genetic engineering, vir and an introduction to molecu	ental Mendelian principles of heredity as well as an introduction to overed include: DNA structure and function, protein synthesis, recombinant ruses and biotechnology. Laboratory will focus on inheritance in fruit flies ular biology techniques including restriction enzymes, PCR, and cloning. ours lecture, 3 hours laboratory
BIOL 245	3	Animal Behavior
Description:	Mentored exploration of the r Emphasis on basic concepts a a lab science.	mechanisms, ecology, and evolution of diverse behaviors of animals. and analysis of reported observations and experiments. Does not count as
BIOL 291	1 TO 3	Special Problems
Description:	Student-oriented laboratory, the Biology faculty.	field, and/or literature studies. Admission to the courses by application to
BIOL 292	1 TO 3	Special Problems
Description:	Student-oriented laboratory, the Biology faculty.	field, and/or literature studies. Admission to the courses by application to
BIOL 305	0 OR 4	Evolution & Diversity
Description:	"descent with modification" th Laboratory studies include we observations of structural and deducing patterns of descent	f the theory of evolution and our current understanding of the pattern of nat has produced the many diverse forms of life that have existed on Earth. orking with models of evolutionary processes, classification of organisms, d functional adaptations important to diverse groups of organisms, and from morphological and molecular data. (Prerequisits: BIOL234 or burs lecture, 3 hours laboratory
<b>BIOL 307</b>	0 OR 4	WI: Ecology
Description:	community, and ecosystem a distribution and abundance a succession, and behavior are	piotic and abiotic factors influence ecological adaptation. Population, evel processes that generate the observed patterns of plant and animal re studied. Patterns of diversity, stability, dominance, biogeography, e examined. Principles are demonstrated through use of case studies, ts. (Prerequisites: BIOL233, 234; or permission of instructor) 3 hours ory

Course	Credits	Title
BIOL 308	1	Botany
Description:		ure, growth, development, and responses of flowering plants. HE103; or permission of instructor)
BIOL 309	0 OR 4	Vertebrate Structure & Funct
Description:	evolutionary context. Beginr identification and descriptior classes using a comparative selected vertebrate types th	omy and physiology, placing vertebrate form and function within an ning with fishes and ending with mammals, emphasis is placed on of key characteristics and evolutionary innovations of the vertebrate approach. The laboratory involves making detailed comparisons among rough observation, microscopy and dissection. (Prerequisites: BIOL233, structor) 3 hours lecture, 3 hours laboratory
<b>BIOL 310</b>	0 OR 4	Developmental Biology
Description:	embryonic development. A c embryological development. explored as time permits. S explore the role of environm	ents a classical and molecular analysis of our current understanding of comparative approach is employed to demonstrate significant patterns in . Although vertebrate development is emphasized, other organisms are tudents conduct directed as well as independent research projects to nental agents on early embryonic development. (Prerequisites: BIOL233, 802; or permission of instructor) 3 hours of lecture, 3 hours laboratory
BIOL 323	0 OR 4	WI: Microbiology
Description:	physiology, and genetics, ar handling and recognition of	l world with detailed study of bacteria: classification, morphology, nd the role of pathogens in human disease. Laboratory stresses aseptic microorganisms, identification of unknown bacteria, and independent : BIOL233-234, CHE103-104; or permission of instructor) 3 hours lecture, 3
BIOL 335	0 OR 4	Principles of Physiology
Description:	cells and groups of cells, pa	al and biomechanical principles and their application to the functioning of rticularly in regard to epithelial transport, neurons, and muscles. I 309, OR BIOL 209 and 210, CHE103-104, or permission of instructor) 3 atory
BIOL 340	0 OR 4	Comparative Animal Behavior
Description:	perspectives, theories, and behavior from both a mecha understand the variety, func examine the development, u behavior to understanding fo Current research advances modeling approaches. Prima text material as deemed neo	th a laboratory component. It is intended to familiarize students with the methods of the biological study of behavior. This course examines animal anistic and a functional perspective. The course will equip students to ction, and evolution of animal behavior across a variety of species. We will underlying neurology and physiology, adaptive function, and application of eeding, habitat selection, communication, reproduction, parenting, etc. will be stressed, including use of mathematical, statistical, and computer ary literature will be a focus of the reading assignments, supplemented by cessary. Students will be exposed to methods for the design, analysis and experiments. (Prerequisites: BIOL 305, 307)
BIOL 366	0 OR 4	Molecular Biology
Description:	genomes and extending to t provide students with a com the analysis of complex syst techniques, transformation,	um of biological understanding, starting with basic properties of genes and he complex interactions fundamental to all living organisms. This course will prehensive picture of the many ways molecular genetics is being applied to tems. Laboratory will focus on molecular cloning methods including blotting electrophoresis, and fingerprinting as well as protein and antibody assays. 4, MATH208 or 302; CHE103-104 or permission of the instructor) 3 hours

\_\_\_\_\_

Course	Credits	Title
BIOL 391	1 TO 4	Biological Research
Description:	supervision of a Biology facu	ademic requirements are invited to conduct a research project under the Ilty member. (Prerequisite: 16 credits in BIOL200 and/or 300 level courses credits in BIOL291 and permission of department)
<b>BIOL 392</b>	1 TO 4	Biological Research
Description:	supervision of a Biology facu	ademic requirements are invited to conduct a research project under the Ilty member. (Prerequisite: 16 credits in BIOL200 and/or 300 level courses credits in BIOL291 and permission of department)
BUS 200	1 TO 3	Special Topics in Business
Description:	Current topics dealing with o	ngoing facets of business administration
BUS 235	3	Business Computer Applications
Description:	Computer applications cover	d development of computer application skills in a practical business context. red include Microsoft Excel, Word and PowerPoint. Cloud computing and ng are examined. These applications are applied to presentations, project and research (Fee applies)
BUS 302	3	Personal Finance
Description:	student with an understandir casualty insurance, wills, tru	ncial evaluation, management, and planning. The course provides the ng of consumer credit, life insurance, health insurance, property and sts, Social Security, stocks, bonds, real estate, mutual funds, retirement student may only receive credit for BUS 302 OR FIN 367.
BUS 303	3	History of American Business
Description:		iness from colonial times to the present. The course offers a variety of case apanies and industries and a thematic emphasis on government-business
BUS 315	3	WI: Business Law I
Description:	transactions. Explores the im (Administrative Law) on busi of law, types of business org	of the principles and doctrines of law as they relate to commercial npacts of judicial decisions (Case Law) and government regulation ness decisions and management. Discussions include: major classifications anizations, contract law as the foundation of all business transactions, and government regulatory agencies.
BUS 316	3	Business Law II
Description:	government regulation) at lo government administrative a	enforcement mechanisms of administrative law (commonly known as local, state and federal levels with an aim for overall understanding of agencies and their impact on the operation of American businesses. Topics oyment, financial, banking and occupational safety laws.
BUS 320	3	Business of Health Care
Description:	will emphasize the complex	are delivery in the United States. A comparative analysis with other nations nature of the health care industry. The course explores the changing nature nd the implications for medical practice and health policy.
BUS 324	3	Entrepreneurship
Description:		ess: from concept to reality. A study of the challenges and responsibilities of I strategies concerning business, financial, and marketing plans, along with , legal, and ethical issues.

Course	Credits Title	
BUS 327	3 Managing Busine	ss Information
Description:	information and the way in which organization	ns access, compile, analyze, interpret and disseminate s use information in the planning, managing, and decision- and the constantly evolving role of information technology ive use of management information.
BUS 333	3 Operational Effe	tiveness
Description:	and distribution of goods and services. Analysi	is operations to create effective and efficient production s and design of effectiveness through analytical and nagement, business process design, Total Quality ite: ECO 307 or FIN 362)
BUS 338	3 Business Ethics	
Description:	customers, shareholders, competitors, and the	ation's responsibilities to its stakeholders: employees, community at large. Moral principles and codes of ethics s of leading and managing a commercial enterprise. This ig (SL) course.
BUS 340	3 Topics in e-Com	merce
Description:	economy. The course objective is to build a so	ies, and tactics of doing business in the Internet lid knowledge of e-commerce, current e-business trends, ies, which will be achieved through case studies and
BUS 345	3 Global Business	
Description:	economy. The course examines international p	es facing multinational companies in today's global olitical, legal, and economic differences, as well as ivities that companies must consider to compete in the
BUS 360	3 Business Manage	ement
Description:		ess management. Emphasis of discussions concentrates ing, leading, staffing and controlling regarding policies
BUS 365	3 WI: Strategic Pla	nning
Description:	business organization. Discussions, exercises, development of organizational mission, vision	objectives, and implementation plans. (Students must
BUS 366	3 Leadership Dyna	mics
Description:		
BUS 398	3 Business Practic	ım
Description:	An internship experience will provide an oppor	the real challenges of working in business management. tunity to combine actual field experience with classroom ourse also provides the opportunity to re-examine ructor permission required)

\_\_\_\_

Course	Credits	Title
BUS 399	3	Business Practicum
Description:	An internship experience will knowledge in an area of spe	ares students for the real challenges of working in business management. provide an opportunity to combine actual field experience with classroom cial interest. The course also provides the opportunity to re-examine ogram level. (Instructor permission required)
BUS 401	1 TO 6	Independent Study & Research
Description:	Provides an opportunity for a phase of the major field.	a junior or senior to engage in independent study and research in a specific
BUS 450	1 TO 12	Special Topics in Business
Description:	Advanced business studies s	pecial topics. (1- 12 credits)
BUSL 308	3	Technology in Decision Making
Description:	major technology used in org as Enterprise Resource Plan	bughout all areas of an organization. This course will focus on some of the ganizations, such as Microsoft Office products (Excel), SAP technology (such ning, through the SAP University Alliance) and Social Networking ther technology components, which are embedded throughout the curricular
BUSL 375	3	Practices in Mgmt & Leadership
Description:		theories and applications are examined. Relating planning, organizing, many leadership styles focusing on the organization and its employees are in the 21st century.
BUSL 377	3	Corp Law&Social Responsibility
Description:	operation of business organi (Case Law), and governmen Discussions include: major c foundation of all business tra Current trends in Corporate	of the principles and doctrines of law that govern the establishment and zations. Explores the impacts of legislation (statutory law), judicial decisions t regulation (Administrative Law) on business decisions and management. lassifications of law, types of business organizations, contract law as the insactions, tort law, and the operation of government regulatory agencies. Social Responsibility that impact organizational governance and in light of their benefits to society.
BUSL 378	3	Team Leadership & Coaching
Description:	rapidly changing, globalized organizational behavior, inclu	knowledge, abilities, and skills needed to lead high-performance teams in a commercial environment. Emphasis is placed on the study of group and uding examination of individual temperaments, interpersonal nge initiatives, mentoring, coaching and conflict resolution.
BUSL 393	3	Global Leadership
Description:	professionals need in order t business operations. Areas o	undational understanding of the knowledge, abilities, and skills that to perform effectively in leadership situations in within globally-oriented of inquiry include leadership theories and styles, interpersonal telligence, group and organizational dynamics, problem and decision nt, and conflict resolution.
BUSL 394	3	Projct Planning/Implementation
Description:	requires decision-making cla resources and capabilities wi	als of successful project management. Execution of complex projects rity, and stakeholder alignment as well as alignment of the steps, timing, ith a project's overall goals. Throughout project implementation, effective of resources and plan revisions impact success.

Course	Credits	Title
BUSL 395	3	Bus Continuity & Disaster Mgmt
Description:		ents to business continuity management (BCM) including planning a holistic acts BCM, response to a disaster, strategies for recovery, development of an n maintenance.
BUSL 396	3	Leading Strategy/Chng in Bus
Description:	scenarios. Key topics cover advantage, and deploymer	trategy development and execution are examined in business case red include vision-driven innovation, pursuit of differentiated competitive at of distinctive capabilities. Although a plan is required to enact a strategy, ever for success is establishing effective change. (Prerequisite: completion of
CCS 103	3	Comparing Cultures-U.S./Others
Description:		and values of mainstream U.S. culture as contrasted with other cultures of the roundtable discussions, and written essays to encourage contrastive analysis
CCS 115	3	East Asian Culture
Description:	history, socio-economic, re factors that have influence forms of East Asian culture with East Asian culture. Th	ents will read and discuss classical and contemporary sources regarding the digious, geographic, food and nutritional habits, immigration and aesthetic d the culture of China, Japan, and Korea. Students will experience various present in our local area and reflect, through journaling, on their interaction will research one specific area of culture and present their findings in their earch paper and presentation to the class.
CCS 201	3	WI: In the Shadow of Hitler
Description:	focuses on how German au means German democracy	or works of German literature from the later 20th Century. The course athors and their readers have grappled with Germany's "freighted" past. This and dictatorship, the moral responsibility for persecution and genocide, the enship, and the anesthetic effects of material prosperity.
CCS 320	3	Hispanic Culture
Description:	outside of the United States	It important traits of the cultures of the Spanish-speaking world within and s. They will further develop their sensitivity toward and appreciation of only through corporate training opportunities. (Prerequisites: SPAN 163, 164,
CCS 332	3	HON: Latinos in the U.S.
Description:	Study of the historical, liter participation in politics and	ary, artistic development of Latinos in US, immigration issues and Latino civil life.
CCS 335	3	HON: Global Studies
Description:	technology, economics, and	is the peoples of the world become more interdependent in terms of d cross-cultural exchange, various issues arise. Examination of the major ts critics, studying how the process occurs in the context of one specific non-
CCS 340	3	Cross Cultural Communication
Description:	Exploration of the dynamic of the globalization of the v	s of international diversity and intercultural communication within the context vorld economy.
CCS 341	3	Cultural Modes of Expression
Description:	Exploration of the nuances	of intercultural expression in the global community for an awareness and

\_

Course	Credits	Title

sensitivity needed for mutual understanding in international affairs. (Offered only in ACCEL® accelerated format.) CUS student required special permission to enroll.

### CHE 100 0 OR 4 Survey of Chemistry

Description: A survey of general, organic, and biochemistry with emphasis on basic chemical concepts and the relationships among these three branches. 3 hours lecture, 2 hours laboratory. (BSN, RN to BSN, Sport Management, and Movement Science students only)

#### CHE 101 0 OR 3 Basic College Chemistry I

- Description: A basic course in the fundamental laws, theories, and experimental techniques of chemistry and the application of chemistry to relevant societal concerns. Introduction to scientific method, matter and elements, chemical reactions, chemical composition. 2 hours lecture, 2 hours laboratory.
- CHE 102 0 OR 3 Basic College Chemistry II
- Description: A continuation of CHE 101, continuing the study of the fundamental laws, theories, and experimental techniques of chemistry and the application of chemistry to relevant societal concerns. Introduction to chemical quantities, energy, modern atomic theory, chemical bonding, acids and bases. 2 hours lecture, 2 hours laboratory. (Prerequisite: CHE 101)

### CHE 103 0 OR 4 Fundamental Chem Concepts I

- Description: A systematic study of the theories and principles governing the composition and behavior of matter. Dimensional analysis, unit conversions, basic atomic theory, basic inorganic nomenclature, introduction to chemical reactions, stoichiometry, gases, and thermochemistry. 3 hours lecture, 3 hours laboratory. (Prerequisites: Secondary school chemistry with at least a B grade or CHE 101-102 at Immaculata with at least a B grade, or permission of the instructor. Pre- or Co-Requisites: MATH 207/208 or MATH 301/302)
- CHE 104 0 OR 4 Fundamental Chem Concepts II
- Description: A systematic study of the theories and principles governing the composition and behavior of matter. Valance bond and molecular orbital theory, solutions, inter- and intramolecular forces, chemical equilibrium, chemical kinetics, and electrochemistry. 3 hours lecture, 3 hours laboratory. (Prerequisites: Secondary school chemistry with at least a B grade or permission of the instructor; CHE 103. Pre- or Corequisites: MATH 208 or MATH 302).
- CHE 105 0 OR 3 Forensic Science
- Description: An introduction to the terminology and techniques used in forensic science. The course will include basic general, analytical and organic chemistry as applied to the analysis of physical evidence such as glass, hair, fibers, fingerprints, firearms, blood, arson analysis, drugs, poisons, DNA, and other relevant forensic topics. Application of the techniques in the laboratory will provide hands-on experience of analytical techniques used in the forensic field.
- CHE 110 1 Lab Techniques in Chemistry
- Description: A two-hour introductory laboratory for those who need a one credit laboratory course.

## CHE 200 3 WI: Chemical Literature

Description: An introduction in how to retrieve and understand chemical information from print and electronic sources. Discussion topics will include: the process of conducting research in chemistry, grant writing, manuscript preparation, the process of peer review, major publishers of chemical literature, different types of journals, and the various types of publications. The course will survey current chemical issues and research. 3 hours lecture

Course	Credits	Title
CHE 201	0 OR 3	Introductory Organic Chemistry
Description:	chemical and physical proper	of carbon compounds. Classification of organic compounds, nomenclature, rties of organic compounds, stereochemistry, and introduction to organic hours laboratory. Open to students who are not concentrating in chemistry. or CHE 103-104)
CHE 202	0 OR 3	Introductory Biochemistry
Description:		of lipids, proteins, carbohydrates, and nucleic acids in relation to ts who are not concentrating in chemistry.(Prerequisite: CHE 201or CHE s laboratory
CHE 211	0 OR 4	Organic Chemistry I
Description:	Classification of organic com	e structure, reactions, and reaction mechanisms of organic compounds. pounds, structure and bonding, nomenclature, stereochemistry, organic chemistry. 3 hours lecture, 3 hours laboratory (Prerequisite: CHE r better)
CHE 212	0 OR 4	Organic Chemistry II
Description:	synthesis and how molecular	e reactions and mechanisms of organic compounds with an emphasis on structure effects reactivity. Carbonyl chemistry, amines, substitution nation reactions, aromaticity and electrophilic aromatic substitution. 3 hours (Prerequisite: CHE 211)
CHE 304	0 OR 4	Instrumental Analysis
Description:		instrumental analysis with emphasis on application of analytical separation ethods, and other methods. 2 hours lecture, 4 hours laboratory and CHE 211-212)
CHE 309	1	Process Chemistry
Description:	include: the SELECT paradig	ocess chemistry, a support branch of synthetic chemistry. Topics covered m, comparison of batch versus continuous flow chemistry, retrosynthetic pharmaceuticals and chemical manufacturing and design of experiments 212)
CHE 310	3	Structural Organic Analysis
Description:	chemical and physical techni	/ presented via a spectroscopic methodology supplemented by classical ques. Topics include mass spectrometry, infrared spectroscopy, 1&2D NMR, d NMR methods, and electron spin resonance (ESR). (Prerequisites: CHE
CHE 313	0 OR 4	Physical Chemistry I
Description:	thermodynamics, fundament equilibria, properties of solut	e study of the properties of bulk matter. Classical chemical cal thermodynamic functions, 1st, 2nd, and 3rd laws, electrochemistry, ions, colligative properties, application of thermodynamics to biological etics. 3 hours lecture, 3 hours laboratory (Prerequisite: CHE 211-212)
CHE 314	0 OR 4	WI: Physical Chemistry II
Description:	partition functions, Quantum	e study of the microscopic properties of matter. Statistical thermodynamics, mechanics, chemical bonding, molecular symmetry/group theory, SR, and NMR. CHE 313 is not a prerequisite. 3 hours lecture, 3 hours

Course	Credits	Title
CHE 315	3	Physical Chemistry III
Description:	A study of the solid state, ch photobiology. 3 hours lecture (Prerequisite: CHE 313-314)	
CHE 317	1	History of Chemistry
Description:	The evolution and ethics of r 1 hour lecture	nodern chemistry from the late 1800s.
CHE 318	3	Advanced Organic Chemistry
Description:	Physical organic chemistry, to organic reactions and metho	the thermodynamic and kinetic basis for organic reactions. Mechanisms of ds for studying them. 3 hours lecture (Prerequisite: CHE 211-212)
CHE 320	3	Inorganic Chemistry
Description:	acids and bases. Study of th organometallic complexes and	d molecular structure related to metal and metalloid compounds. Review of e structure and reactivity of the main group elements, transition metal, and nd compounds. Use of spectroscopic data in interpreting structure and bunds. 3 hours lecture (Prerequisite: CHE 313)
CHE 326	3	Fundamentals of Medicinal Chem
Description:	organic chemistry of drug sy pharmacokinetics and pharm	ug discovery and drug design. Topics include: the drug discovery process, inthesis (lead compounds and analogues), therapeutic areas elementary nacodynamics, recptor sites and drug targets, optimization of physio- chanisms of drug action in biochemical pathways. (Prerequisite: CHE 211)
CHE 327	0 OR 3	Analytical Chemistry
Description:	analysis applicable to topics preparation, equilibrium, sta	hemistry elective with an emphasis on classical quantitative chemical important to chemistry and biology majors. Topics will include: sample tistics for analysis of data; methods will include, titration, gravimetric, nd colorimetric analysis. (Pre-requisite: CHE 211) 2 hours laboratory, 1
CHE 330	3	Biochemistry I
Description:		ior of biomolecules, receptors/signaling mechanisms, and a consideration re. (Prerequisite: CHE 211-212 with a grade of C or better)
CHE 331	3	Biochemistry II
Description:	Selected topics in metabolism biomolecules. 3 hours lecture	n, biosynthesis, hormonal regulation, and information pathways of e. (Prerequisite: CHE 330)
CHE 399	1 TO 3	Intro Lab & Recitation Tchg
Description:	teaching either a CHE 1XX o mentoring the students durin addition the student will serv course. They will not be invo	er laboratory course where the student works with a faculty member r CHE 2XX level course. The student will be exposed to safety, setup and ng the laboratory hours under the direction of the laboratory instructor. In re as a tutor and mentor for those students enrolled in the laboratory loved in any grading of the enrolled students. It is open to any STEM or ation student. (Prerequisites: a grade of B or better in CHE 103/104 and
CHE 401	1 TO 6	Advanced Research in Chemistry
Description:	Student works on a laborato	ry research project with permission and guidance of a Chemistry

Course	Credits Title	
	Department faculty member.	
CHE 402	1 TO 6 Advanced Re	search in Chemistry
Description:	Student works on a laboratory research pr Department faculty member.	oject with permission and guidance of a Chemistry
CIS 105	3 3D Computir	g
Description:	associated with computing. Provides an un	visual environment which simplifies the complexities derstanding of computing constructs, logic, object-oriented algorithms, and problem solving through the creation of 3D students)
CIS 203	3 Computers a	nd Information
Description:	to information. Hands-on use of computers knowledge and skills necessary to use con	ging about the current shift in the meaning of and the access will be an essential ingredient in the development of the aputers for common business applications, in an nology, and in the ability to assess the advantages and nat only)
CIS 209	3 Introduction	to Linux
Description:		stem within computer systems. This includes hands-on ux. Emphasis will be placed on utilizing Linux in a professional
CIS 218	3 Software De	sign&Programming I
Description:	problem solving, algorithm design, decom understandable components, evaluation of	g and creating software applications. Content includes position of complex ideas into manageable and algorithm design and implementation via an object-oriented d CIS 105, an approved prior programming course, or
CIS 224	3 Database an	d Information I
Description:		including: development life cycle, data modeling, SQL, ments. Hands-on projects give the student practical I is taken, CIS 226 cannot be taken.
CIS 226	3 Databases:Q	uerying & Reporting
Description:		odeling process with an emphasis on interpreting data lery Language (SQL), and determining reporting 4 cannot be taken.
CIS 317	3 Networks an	d Infrastructure
Description:	Introduces technical strategies in terms of the infrastructure supporting data commun	the hardware, software, and networking concepts that form ication for organizations.
CIS 326	3 Data Structu	res
Description:		on. Topics include strings, lists, graphs, and trees; file s, applications. (Prerequisite: CIS 218, approved prior proval)

Course	Credits	Title
CIS 335	3	Technology and Ethical Issues
Description:	Explores the historical, ethic	essional environment and context in which information technologists work. al, and legal aspects of computing as it applies to organizations. Also d teamwork skills relevant to presenting technical information.
CIS 343	3	Analysis and Modeling
Description:	Introduces the concepts and approaches used to perform analysis; thus, determining the requirements needed for an information system. Applies the analysis results by illustrating the requirements using modeling techniques.	
CIS 345	3	Data and Information II
Description:	Explores advanced topics of data theory and practice, including data quality, data integration, data administration, and overviews of distributed databases and object-oriented data modeling. (Prerequisite: CIS 224)	
CIS 351	3	Software Design&Programming II
Description:	Applies advanced concepts f of problem solving, algorith 218 (Prerequisite: CIS 218)	for designing and creating software applications. Continues the development m design and implementation via object-oriented programming begun in CIS
CIS 405	1 TO 3	Professional Internship
Description:	A limited-enrollment, mentored professional field experience in the application of computer-science skills. Students apply for positions that will provide hands-on field experience and enhance career readiness. (By prior arrangement with a member of the department)	
COM 190	1	Theatre Practice
Description:	Participation in the fall or spring production of Cue and Curtain (major role or responsibility). Open to all students who qualify by audition or experience.	
COM 200	3	Business & Technical Writing
Description:	An introduction to style and forms in business and technical writing with emphasis on an understanding of global communication in the modern workforce and the importance of purpose and audience, using direct writing and clear language.	
COM 201	3	Sign Language I
Description:		SL) is the language used by the Deaf Community in the United States. vill help students learn vocabulary and the sentence structure needed to ican Sign Language.
COM 202	3	Sign Language II
Description:	American Sign Language II	SL) is the language used by the Deaf Community in the United States. will continue the learning started in American Sign Language I and help nd the sentence structure needed to communicate through American Sign DM 201)
COM 206	3	WI: Journalism
Description:		ce of journalism and the role of the journalist in today's media world. n understanding of and enjoy the process of journalistic writing in all of its

Course	Credits	Title
COM 207	3	Intro to Creative Writing
Description:	Discussion of terms, strateg critiquing.	ies, and professional models in poetry and fiction with practice in writing and
COM 208	3	Cell Phone Photography
Description:	This course will engage in critical thinking as to the intent of cell phone cameras in our culture and provide theory to support some discourse on responsible use of such devices while also providing instruction on maximizing both picture and video usage of these cell phones to fully engage, appreciate, and capitalize on the values of such in the fields camera functions & operation, workflow, cell phone photo apps, and photoshopping/editing images with phone apps.	
COM 209	3	WI: Short Story Writing
Description:	growth of the magazine indu course looks to explore as n	a long and engaging history tied to the evolution of national identity, the ustry, and the proving ground for major literary movements and styles. This nuch of that rich history, (as chronologically and diversely as possible), recognized and underappreciated purveyors of the genre.
COM 210	3	Broadcasting Basics
Description:		dcasting history and medium. Includes principles of voicing, posture, Id interaction with copy on the screen.
COM 211	3	HON: Media and Love
Description:	On film and through new technologies, media have influenced how we find romantic love, what we expect from romance, and where or with whom we make meaningful connections. This course will ask students to think critically about media representations in American Culture, as well as new technologies of love. Do media help us understand and practice love? If not, how can we expand our conception of love beyond formulaic narratives and compatibility matrices? Why is popular culture so myopically focused on romantic love? How are different kinds of love connected to our search for a happy and meaningful life? Our exploration will be theoretically grounded by readings in Cultural Studies, which proposes media representations as ideologically charged through rhetorics of difference (race, class, gender, etc); Media Ecology, which sees new technology as an environment that dictates the kind of conversations we can have, who can speak, and who can listen; and perspectives on the concept of love	
COM 212	3	Video Production Basics
Description:	plan a video production, ope	ss of video production for professional use. Students would learn how to: arate various pieces of production equipment, produce a program, evaluate productions, and determine the appropriate type of production for a given
COM 216	3	Media Scriptwriting
Description:		is for broadcast radio and television, cable systems, and podcasts. Students priate formats for writing continuity, including commercials and PSAs, as nal programs.
COM 217	3	Broadcast Performance
Description:		body work in front of the camera through basic elements of anchoring, sting, interviewing, and commercial reads for both radio and television.
COM 218	3	Broadcast Marketing
Description:	estimating costs, as well as and mobile. Students will lea	ng marketing objectives into media objectives, analyzing audience data and buying and selling advertising time and space for radio, television, Internet arn to evaluate all major media assessing their inherent strengths and evelop focused media campaigns and compelling media presentations.

\_\_\_\_

Course	Credits Title
COM 220	3 Media Programing
Description:	Introduction to the theory and practice of programming for electronic media, including broadcast radio and television, cable TV, satellite radio and TV and online video and audio.
COM 221	3 Broadcast Performance II
Description:	An extention of the broadcast performance class focusing on finer skills sets of broadcast arts culminating in a full-class project benefitting the university. (Pre-requisite: COM 217)
COM 222	3 Health Communication
Description:	How do we talk about "health?" How should important health information be delivered? Can we really create healthy behaviors through targeted communication? In the first half of the semester, students will be introduced to issues in doctor-patient interaction, social and cultural perspectives on health, mass media representations of healthy and risky behaviors, and communication within health organizations. In the second half of the semester, students will develop health communication campaigns designed to address real-world health problems through the application of health communication theory and research.
COM 224	3 WI: Writing for the Web
Description:	This course focuses on the language, form, presentation value, and effective communication of email, business and corporate websites, blogs, wikis, microblogs and professional social networking sites as a response to and in continued anticipation of cultural shift to on-line self-sufficiency.
COM 225	3 The Film Experience
Description:	Introduction to and analysis of literary, sensory, technical, genre-based, and production aspects of film. This will largely be accomplished via film clips and reaction papers. A cohesive study of entire films presented in long papers will culminate the course.
COM 226	3 Mass Media
Description:	A survey of the historical development and contemporary issues of both print and non-print media with a focus on mass media as it pertains to our digital world today. This course is a deliberate review of basic communication theory and seeks to comprehend the historical contexts of major mass media entities while developing a capacity for strategic thinking when considering media.
COM 227	3 Decoding the Media
Description:	Media, the great monolith, and the entity that is so full of biases and light on objectivity thrives in this hyper-connected, reflexive, postmodern world, and it is not going away; in fact, it will only continue to be exacerbated, so one might as well strive to be media literate, at least in a cursory sense. That is where this course comes in. Media, collectively, are full of narratives and intents seeking audiences and attention. However, media literacy is very much about the stories we as audiences generate about said media. A one semester course cannot offer a comprehensive understanding of media literacy, but attempts at providing some structure, insight, confidence, and agency in relation to understanding and engaging media are realistic expectations.
COM 228	3 Women and the Media
Description:	This course investigates the relationship of women and media through film, television, magazines, news, politics, advertising, and the internet. Media, collectively, are full of narratives and intents seeking audiences and attention. However, media literacy as it pertains to women is very much about who or what is driving those stories and the cultural impact they leave upon us. The ultimate goal is to determine if there are women in media today who are self-actualized enough to transcend stereotyping and exploitation and what our cultural response is to such women.
COM 230	3 Global Media
Description:	An examination of the role of communication media in the context of changing global realities. The course examines the theoretical underpinnings of understanding multiculturalism and the effect of the

processes that constitute difference as we define it. The course explores the multicultural practices, theories, polices, normative models, relationships between media and society, and the production of cultural diversity. (Fulfills the required course for the Global Studies Minor)

- COM 232 3 Narrative and Screenwriting
- Description: Introduces students to tools, vocabulary, and techniques used to tell a screen story and take an original idea to outline form. Students become familiar with screenwriting terminology as scenes from well-known films are analyzed to reveal structural elements in the writing. By the end of the course, students have developed an original idea into a detailed short-length screenplay.
- COM 233 3 Short Films
- Description: Students will take the screenplays from COM 232 and learn all of the production attributes of film necessary to bring those screenplays to life in the form of 10-20 minutes films.
- COM 234 3 WI: Life Writing

Description: An introduction to the contemporary memoir and the related genres of life writing, the autobiographical essay, the personal essay, etc. The course will require a balance of reading well-known contemporary authors as well as working on our own essays, including weekly writing, sharing, editing, and providing feedback to others. Topics covered will include defining memoir, the nature of memory and truth, how to make our life experiences accessible to readers, form, scene, character, voice details, and methods for critique and revision. Students will also document their writing process through memos, drafts, and a final portfolio project.

## COM 236 3 Children's Theatre

Description: Introduction to stagecraft with practical applications to productions for children.

- COM 237 3 Film Genre Study
- Description: This course will focus on specific genres, directors, themes or eras in film as comprehensively as possible through critique and analysis of film directly and consideration of cultural context and critical analysis and academic evaluation of said theme. The topic of the course will be a revolving one.
- COM 238 3 Communication Research Methods

and our dependence upon technological devices for the management and communication of every facet of our lives is paramount. Topics covered include the technological impact upon such themes as: religion, politics, entertainment, healthcare, education, sports, social media, and business.

- IDM 220
- 3 Prin Interactive Digital Media
- Description: This course is an introductory course to the world of interactive and digital media design. The focus will be on creating interactive experiences that are both functional and engaging. This will be approached from various points-of-view: design, usability, technique, and entertainment. Students will explore ways of constructing types of digital media and consider aesthetic, technical, and social effects of this work.
- IDM 325 3 Dynamic Program & Frameworks
- Description: This course is an introduction to computer programming using various programming languages, such as: Processing, HTML, Java, C++, Python and others. This course covers basic procedural techniques such as variables, data types, selection, iteration, and functions. It will also introduce students to objectoriented programming. We'll also look at various general programming concepts, such as algorithm design and debugging. By the end of the course, students should be able to construct a moderatelysized, coded program.
- IDM 330 3 Found of Animation & 3-D Model
- Description: This course offers a comprehensive introduction to the techniques, theory, history and cultural significance of animation and 3-D Modeling. Students will explore the history of animation as an entertainment and art form as well as demonstrate and apply basic skills in traditional (cell/stop motion) and digital animation.

### IDM 405 3 Internship

- Description: The IDM internship Program provides an opportunity for professional experience supporting application and further development of the knowledge gained in the classroom. Under faculty supervision, students work in positions related to their program and/or career goal, and complete reflective academic assignments. Specific assignents related to project management, project development, and project completion will be required in the internship. Mentors in the field will complete a review of student projects, supervision of student's day-to-day work in the industry, and a final professional characteristics and professional skill set evaluation. (Prerequisites: IDM 110, 220, 325, 330)
- IDM 410 3 Senior Capstone I:Rsch & Innov
- Description: The first of two courses in the IDM Capstone sequence, and to be followed by IDM 420. This course requires students to conduct rigorous research into an area of interest within Interactive Digital Multimedia, and to devise a project that demostrates that research. Students are expected to implement a series of proofs-of-concept and ultimately write a thorough proposal for the project they will execute in the second semester of the IDM sequence, IDM 420. (Capstone)
- IDM 420 3 Senior Capstone II:Proc & Publ
- Description: The second of two courses in the IDM Capstone sequence, proceeded by IDM 410. In this capstone course, students work closely with faculty to implement, test and refine the project they devised in the earlier semester. This course is writing-intensive, requiring students to extensively document their research, their process and their results. It is required that each student will have a working product prototype. (Capstone Prerequisite: IDM 410)
- INFO 103 3 Introduction to Data Analytics
  - Description: Introduces the fundamentals of data analysis. Students learn to gather and interpret data in order to gain insight into possible future trends and strategies. Research and case studies exemplify how data analytics is being used in business and industry.

Course	Credits	Title
INFO 104	3	Computer Technology & Appls
Description:		to effectively and efficiently use technology to increase productivity in terms and the management of information systems. Case studies are used to in various industries.
INFO 105	3	Storytelling with Data
Description:	A first course in creating and format that explains and inte	d using charts, graphs, data maps, infographics in order to present data in a erprets data.
INFO 120	3	Web Design Fundamentals
Description:		technology and tools used for designing and managing web-based content. he development of the skill proficiency required for designing and managing o all students)
INFO 125	3	Intro to Information Policy
Description:	the collection and use of dat	through case studies that highlight the advantages and challenges regarding a/information for individuals and organizations. Information policy topics to the collection, access, security, and privacy of data/information.
INFO 151	3	Sports Analytics
Description:	predictions on the vast amou sports analytics - on-field (e management. Students will	tatistical thinking and statistical methodology to make inferences and unts of data available in the world of sports. There are two key aspects of .g. player and playing analytics) as well as the business side of sports explore how examples like Moneyball and Trust the Process are influencing evolutionary approach to organizational management.
INFO 200	3	Topics in Technology
Description:	A topic in technology outside	e the standard course offerings in a specialized area of technology.
INFO 214	3	Multimedia: Concepts & Design
Description:	Explores the philosophical, c both creativity and the desig (Open to all students)	cultural, and sociological aspects of multimedia. Hands-on projects utilize on process required to organize and produce a multimedia presentation.
INFO 215	3	Social Media Dynamics
Description:	digital technology. Develops	oftware while exploring the benefits and issues associated with the latest proficiency in terms of effective use of data and information: searching, g, and communicating via the latest social computing tools. (Open to all
INFO 230	3	Web Design Applications
Description:	approaches leading to the in	g, implementing, and testing web-based applications. Considers design nplementation of effective interfaces appropriate for the users of the se of current tools, databases, and digital media.
INFO 240	0 TO 3	Technology Workshops
Description:	Develops basic skills in spec to all students)	ific electronic tools and technologies. Specific content offerings vary. (Open
INFO 310	3	System & Project Management
Description:	Explores the processes need	led to define, design, build, buy, validate, and integrate systems into an

Course	Credits	Title

organization. Develops the skills required for requirements engineering, identifying system components, acquiring, sourcing, integrating, testing and deploying systems for organizations.

## INFO 400 1 TO 3 Topics in Technology

Description: Explores, through study or research, a specific topic chosen by the student (or a small group of students) and approved by a member of the department. (By prior arrangement with a member of the department.)

#### INFO 404 3 Human Computer Interaction

- Description: Introduces the issues concerning computer and software application usefulness and usability to the user community. Focuses on the ability to recognize the needs of application users in the context of accomplishing work within and across organizations. Considers a broad spectrum of skills, including but not limited to topics such as user and task analysis, ergonomics, human factors, accessibility standards as well as cognitive psychology.
- INFO 405 1 TO 3 Professional Internship
- Description: A limited-enrollment, mentored professional field experience in the application of informationtechnology skills. Students will apply for positions that will provide hands-on field experience and enhance career readiness. (By prior arrangement with a member of the department.)

## INFO 408 1 TO 3 Research Fundamentals

- Description: Provides an introduction to the methods currently used by researchers in this field. The research area (mathematics, computer and/or information technology) and specific topic is selected by the student in consultation with the instructor.
- INFO 409 3 WI: Directed Readings
- Description: Examines specific themes via assigned readings. The themes are selected by the group and instructor. Oral presentations as well as written reports are required.
- INFO 410 3 Senior Seminar
- Description: Uses professional research methods for the development of an in-depth research paper and presentation on a mathematics, computer, and/or information technology related topic. Topics are chosen by the student in consultation with the instructor from current research areas or areas of emerging interest.
- ITA 101 3 Elementary Italian I
- Description: Introduction to the four basic language skills: speaking, writing, listening, reading. Emphasis on pronunciation and the fundamental elements of verb and sentence structure. Laboratory work required. (Offered every fall)
- ITA 102 3 Elementary Italian II
- Description: Continuation of pronunciation and basic elements of verb and sentence structure through oral and written exercises. Laboratory work required. (Prerequisite: ITA 101 or instructor's approval)
- ITA 201 3 Adv Intermediate Italian I
- Description: Contemporary overview of Italian language, syntax and grammar with materials selected for exploring Italian culture. Emphasis on development of student autonomy in Italian, especially in speaking and writing. Laboratory required. (Prerequisite: ITA 102 or instructor's approval)

Course	Credits	Title	
ITA 202	3	Adv Intermediate Italian II	
Description:		y overview of Italian language. Emphasis on development of student lly in speaking and writing. Laboratory required. (Prerequisite ITA 201)	
ITA 301	3	Study Travel	
Description:	Study/travel immersion course conducted in English with the option of receiving credit in Italian. Classes meet once a week in the spring. Travel in May with final paper required to receive credit. Limited enrollment. Travel costs additional. Students who opt for Italian credit will utilize the Italian versions of the readings and films when available. Students may be enrolled in ITA 202 simultaneously with this course. This course is cross-listed with HIST 301 and ART 216. No prerequisite required for History or Art credit.		
MATH 101	0 OR 3	Basic College Mathematics I	
Description:		najoring in non-science fields. Concepts and applications of problem operties of numbers, application of number systems, algebra, and personal	
MATH 102	3	Basic College Mathematics II	
Description:		najoring in non-science fields. Concepts and applications of measurement, tics, voting and apportionment, and graph theory.	
MATH 106	3	Introductory Algebra	
Description:	through development of mat problems. Topics include: lin expressions; radical express	cepts and language. The fundamental concepts of algebra are explored hematical models, interpretation of graphs, and solving of real-world ear equations and inequalities; polynomials and factoring; rational ions; quadratic equations; and function notation. Designed for students who natical background prior to entering MATH 203-204.	
MATH 109	3	Math Fundamentals for Educ I	
Description:	elementary and middle scho	course is an overview of the mathematical topics commonly taught in ols, including: numbers and operations; algebra; geometry; measurement; bility. In addition to the mathematical topics in the course, classroom agogical methods.	
MATH 110	3	Mathematics for Nurses	
Description:	ratio and proportion, percent	of mathematical concepts including: roman numerals, fractions, decimals, tages, conversions, and various calculation methods within the context of ht from a problem-solving perspective.	
MATH 111	3	Math Fundamentals for Educ II	
Description:	elementary and middle scho	course is an overview of the mathematical topics commonly taught in ols, including: numbers and operations; algebra; geometry; measurement; bility. In addition to the mathematical topics in the course, classroom agogical methods.	
MATH 200	3	Topics in Math	
Description:	A topic in mathematics outside	de the standard course offerings in a specialized area of mathematics.	
MATH 203	3	Pre-Calculus I	
Description:	Course content includes read numeric understanding of the	ysis of data and functions through the interpretation of real-world examples. ding, displaying, and interpreting data; gaining a graphic, symbolic, and e algebra of functions including compositions, transformations, and differences between the basic functions including linear, polynomial,	

exponential, logarithmic, and trigonometric functions; and transforming data into equations through regression analysis. Use of spreadsheet technology will be integrated. (Requires competency in content covered in MATH 106.)

- MATH 204 3 Pre-Calculus II
- Description: Continues the content of MATH 203 with an emphasis on developing, using, and interpreting mathematical models. Course content includes: solving systems of equations and inequalities including the use of matrices and linear programming; developing a deeper understanding of the basic functions including linear, polynomial, exponential, logarithmic, and trigonometric functions; and applying arithmetic and geometric sequences and series to real-world examples. Use of spreadsheets and other technology will be integrated. (Prerequisite: MATH 203 or equivalent)
- MATH 205 3 Retail Math I
- Description: Applies mathematics to retail concepts. It demonstrates mathematics as a language that quantifies retail concepts so that the concepts are measurable. The measurable concepts are then analyzed to assist in the decision making process. Topics covered include: sales elements, retail pricing and repricing, markup equations, inventory, dollar planning and control, and profit.
- MATH 206 3 Retail Math II
- Description: This course applies mathematics to advanced retail concepts. It demonstrates the use of mathematics, reasoning, and communication to retail decision making via case studies. (Prerequisite: MATH 205)
- MATH 207 3 Applied Calculus I
- Description: Focus on the study and analysis of data and functions through the use of limits and derivatives. Course content includes understanding of limits and continuity; interpreting the growth or decay of a function by using derivatives; and solving optimization problems. In addition, students will transform real-world data into symbolic representations through regression analysis, and then use the symbolic representation to perform calculations. Use of spreadsheets and other technology will be integrated. (Requires competency in content covered in MATH 203 -204.)
- MATH 208 3 Applied Calculus II
- Description: Focus on the study and analysis of data and functions through the use of integration. The emphasis will be on using integrals to solve real-world problems. Students will often transform data into symbolic representations through regression analysis, and then use the symbolic representation to perform calculations. Use of spreadsheets and other technology will be integrated. (Prerequisite: MATH 207 or MATH 301 or equivalent)
- MATH 216 3 WI: Discrete Math
- Description: Introduction to discrete mathematical concepts including: logic, sets, sequences, probability, combinatorics, functions, relations, and graphs. The material will be taught from a problem-solving perspective with emphasis on applications to Information Technology.
- MATH 217 3 Math Concepts for Managers I
- Description: This course makes explicit the connections between mathematics, mathematical modeling, and organizational dynamics. Students explore the mathematics behind tools used in the business environment and build an understanding of the mathematical infrastructure that supports management decisions. Topics include use of path analysis, linear programming, and the interpretation of graphs and statistics.
- MATH 219 3 Math Concepts for Managers II
- Description: A continuation of MATH 217, this course makes explicit the connections between mathematics, mathematical modeling, and organizational dynamics. Students explore the mathematics behind tools used in the business environment and build an understanding of the mathematical infrastructure that

Course Credits Title	
----------------------	--

supports management decisions. Topics include saving models, borrowing models, mathematics supporting digitizing information, and growth models.

#### MATH 224 3 HON: God, Universe, & Math

Description: A survey of mathematical concepts in the context of philosophy and history. Initially, students learn mathematics by studying the problem solving methods used by philosophers and scientists. Through this approach, students view past problem solving as an iterative process - as the philosophers/scientists encountered both success and failure. Being enlightened by these various approaches, students develop their personal problem solving techniques when solving mathematical problems.

#### MATH 303 3 Introduction to Proof

- Description: Introduction to mathematical proof techniques. Elementary topics from set theory and number theory will be used to teach common proof methods. This course is designed to facilitate the transition into the expectations of upper-level mathematics courses. (Prerequisite: MATH 216)
- MATH 304 0 OR 3 Calculus III
- Description: Continuation of MATH 301-302, covering additional topics from calculus, including L'Hôpital's Rule, improper integrals, infinite series, parametric equations, polar coordinates, vectors, and surfaces in space. This course continues with the principles from MATH 207-208, including lab exercises that utilize technology to address conceptual understanding, mathematical modeling, and data analysis. 2 hours lecture, 2 hours laboratory. (Prerequisite: MATH 207-208)
- MATH 305 0 OR 3 Calculus IV
- Description: The culmination of the calculus sequence, covering topics in multi-variable calculus, including vectorvalued functions, partial derivatives, multiple integration, and line integrals. The principles from the rest of the calculus sequence are continued in this course, including laboratory exercises that utilize technology to address conceptual understanding, mathematical modeling, and data analysis. 2 hours lecture and 2 hours laboratory. (Prerequisite: MATH 304)
- MATH 307 3 Probability and Statistics
- Description: The topics of this course include: basic concepts of probability; random variables, common distributions, and applications; and basic concepts of statistics including sampling distributions, confidence intervals, hypothesis testing, and regression. (Prerequisites: MATH 207 and 208 or MATH 301 and 302 or instructor's approval)
- MATH 308 3 Numerical Analysis
- Description: This course introduces numerical techniques for approximating solutions to a variety of problems spanning algebra, differential and integral calculus, interpolation, differential initial-value equations, and linear systems. Convergence criteria and error analysis associated with approximation methods will also be considered. (Prerequisite: MATH 304 and CIS 218)
- MATH 309 3 Differential Equations
- Description: Ordinary differential equations taught from a mathematical modeling perspective. Topics include: firstorder equations, linear equations with constant coefficients, special systems of equations, and special equations of higher order. Real-world applications and technology are integrated. (Prerequisite: MATH 302 or 208)

MATH 310	3	Modern Algebra
----------	---	----------------

Description: A rigorous introduction to the theory of groups, rings, and fields. (Prerequisite: MATH 303 and MATH 311 or instructor's approval)

Course	Credits	Title
MATH 311	3	Linear Algebra
Description:	A study of vector spaces, m 303)	atrices, determinants, and systems of linear equations. (Prerequisite: MATH
MATH 312	3	Modern Geometry
Description:		lopment of postulational systems. Both Euclidean and non-Euclidean (Recommended prerequisite: MATH 303)
MATH 322	3	Real Analysis
Description:		topics of calculus, including: sequences, limits, continuity, derivatives, quisites: MATH 303, MATH 304)
MATH 350	3	Operations Research
Description:	assignment problems, equip	r programming, dynamic programming, transportation and network theory, ment replacement, scheduling problems, inventory cotrol, decision theory, y, and simulation. Emphasis will be on methodology. (Pre-requisites: CIS
MATH 400	1 TO 3	Topics in Mathematics
Description:	A study of selected topics ou of the course will vary depen	utside usual offerings; by prior arrangement with the department. The topics nding on the students' interests.
MATH 405	1 TO 3	Professional Internship
Description:	Students will apply for positi	red professional field experience in the application of mathematics skills. ons that will provide hands-on field experience and enhance career ement with a member of the department.)
MATH 408	1 TO 3	Research Fundamentals
Description:		he methods currently used by researchers in this field. The research area d/or information technology) and specific topic are selected by the student in tor.
MATH 409	3	WI: Directed Reading
Description:		a assigned readings. The themes are selected by the group and instructor. s written reports are required.
MATH 410	3	Senior Seminar
Description:	presentation on a mathemat	methods for the development of an in-depth research paper and cics, computer, and/or information-technology related topic. Topics are isultation with the instructor from current research areas or areas of
MATH 411	3	Strategies for Teaching Math
Description:	schools, and the appropriate projects will explore how the	s teachers, exploring strategies for teaching mathematics in middle and high e use of computers and technology in the classroom. Discussions and e use of historical and multi-cultural materials can enhance the experience introduced to the benefits of membership in professional organizations.
MATH 412	3	Capstone Experience for Tchrs
Description:		inear algebra, algebraic structures, statistics, number theory, and how these topics apply to middle and high school curriculum. The

Course	Credits	Title	
	completion of a written pa	aper is required. (Prerequisite: MATH 301-302)	
MES 200	3	Middle Eastern Literature	
Description:	Examination of the development of the short story, novel, and verse in Turkey, Iran, and the Arabic countries. Because this literature is so rich and diverse, the specific subject of the course will vary from semester to semester. Repeatable to a total of twelve credits.		
MES 201	3	Wars of the Middle East	
Description:	Examination of the history of conflicts in this vital area from the First World War to the current war in Iraq. While the course provides appropriate political, social, and economic context for understanding events, the emphasis is upon understanding international relations and military.		
MES 301	3	Arab Encounter with the World	
Description:	Examination of Arab encounters with the outside world from the Middle Ages through the present, looking at Islam's outward reach in such areas as exploration, trade missions, and conquest, and at the response to foreign cultures.		
MES 303	3	Power,Politics & Ethics of Oil	
Description:	An overview of the historic, economic, political, and legal development oil industry from its formation to the present. Special attention is paid to the intricate relationship between the oil industry, the Arab states, and the world economy.		
MES 304	3	Modern Middle Eastern Politics	
Description:	Examination of the domestic politics and international relations of the Middle Eastern states since the end of colonialism. Topics include the tension between Pan-Arabism and the nation-state, strategies of political and economic development, the contested history of democracy, and engagement with the great powers.		
MES 305	3	Islamic Art and Architecture	
Description:	Survey of the diverse forms of artistic expression in the Islamic world from the time of the Prophet through the present.		
MES 306	3	Role of Women in Middle East	
Description:	Examination of the familial, social, traditional, religious and political status of women within a range of Middle Eastern countries and ethnic groups including Iran, Iraq, Egypt, Turkey and Israel.		
MES 346	3	Middle East History & Politics	
Description:	A study of the historic forces that have shaped the contemporary Middle East, and an analysis of the region's significance in international politics including basic principles of Islam, Arab culture, and the influence of new forces in the Middle East.		
МКТ 200	1 TO 3	Special Topics in Marketing	
Description:	Current topics dealing wit	h ongoing facets of marketing.	
МКТ 309	3	Marketing Principles&Practices	
Description:	considerations of consum	ctions, and institutions with particular emphasis on consumer goods. Basic er motivation and behavior; retailing and wholesaling; product planning; es; marketing research; advertising and sales promotion.	

Course	Credits	Title
MKT 310	3	Innovative Mrktng Strategies
Description:	and leverage value in the m	ization is a key to success. This course will focus on ways leaders create arketplace. Students will examine ways in which organizations communicate ment. Social and mobile media, as well as other emerging platforms, will be
MKT 331	3	Advertising Principles
Description:	account supervisor. Covers	nanagement from the perspective of the product manager or agency fundamentals of planning and budgeting for an advertising campaign, media basics of commercial design and production for print and broadcast.
MKT 350	3	E-Marketing
Description:	marketing methods and stra projects, students will exami marketing via this technolog	le of electronic resources (particularly the Internet) in contemporary tegies. Using a combination of case studies, simulations, and hands-on ine the financial, technological, organizational, and ethical implications of y in both retail and business-to-business marketing ventures, as well as orm of marketing with more traditional marketing venues. (Prerequisite:
MKT 351	3	Retail Marketing
Description:	and large retailers, innovativ	keting, examining various retail formats, practices and strategies of small ve strategies for retailing, franchising, retail firm organization and planning, resources and merchandise. (Prerequisite: MKT 309)
MKT 352	3	Marketing Sales
Description:	making policies related to sa the professional selling proce	mination of planning, organizing, directing, and controlling the decision- ales marketing. Course will investigate the skills and activities involved in ess and its goals of producing sales, building and maintaining customer ompany profit. (Prerequisite: MKT 309)
MKT 354	3	Social Media Marketing
Description:	corporate blogs fit into an or	ne social media platforms such as Facebook, Twitter, YouTube, and ganization's overall marketing strategy. Course will investigate the skills signing and implementing effective social media marketing strategies.
MKT 355	3	Brand Marketing
Description:	with a general concentration	theories of brand strategy will be discussed, researched and implemented, and then specifics regarding certain products and services. Brand-related tion process of brand strategies will be measured for marketing Prerequisite: MKT 309)
MKT 357	3	Global Marketing
Description:	challenges. The course surve strategies, global marketing	ct and service marketing in the global marketplace and the associated eys international marketing approaches, foreign market dynamics, entry strategy, marketing plan, and communication plan. A spring break component of this course. The cost of the trip is an added fee for this 109)
MKT 359	3	Marketing Research
Description:	data collection, data analysis	s in the processes and purposes of marketing research. Research design, s, and application of research in problem solving and decision making will be 309; Co-requisite: ECO 307)

Course	Credits	Title
МКТ 364	3	Marketing Management
Description:	international markets. Heav	oles of marketing management and marketing managers in national and y case study emphasis enables discussions leading to the rational of product and service industries. (Prerequisite: MKT 309)
МКТ 398	3	Marketing Practicum
Description:	resources. An internship ex classroom knowledge in an	pares students for the real challenges of working in the field of human perience will provide an opportunity to combine actual field experience with area of special interest. The course also provides the opportunity to re- s at the program level. (Instructor permission required)
МКТ 399	3	Marketing Practicum
Description:	resources. An internship ex classroom knowledge in an	pares students for the real challenges of working in the field of human perience will provide an opportunity to combine actual field experience with area of special interest. The course also provides the opportunity to re- s at the program level. (Instructor permission required)
MSI 101	1	Leadership & Personal Dvlopmnt

MTR 100	1	Orientation to Music Therapy
Description:		nerapy field. Areas addressed include educational and training requirements underpinnings of music therapy; and an introduction to major orientations to
MTR 103	0.5 OR 1	Clinical Music Skills
<b>D</b>		

Description: Private instruction for one-half hour weekly. This course concentrates on learning clinical music skills in piano, voice, and guitar and is a requirement for all Music Therapy majors. Course must be repeated

Course	Credits	Title

until all levels of competency is achieved as assessed in MTR 104, 105, and 106. Additional fee applies.

- **MTR 104** 0 Clinical Music Skills Eval I
- Description: An evaluation of musical competence in which the student prepares 10 songs (5 children and 5 adults) on piano and guitar, and performs a selection of these in a jury. These music skills are evaluated using competency criteria that include tunefulness of singing, guality of accompaniment, and overall musical integration. In addition, the student is required to transpose one of the prepared songs at sight and provide a simple accompaniment for a melody line provided during the jury using I, IV and V chords. Students must pass this evaluation in order to be admitted into MTR300 Music Therapy Practicum. Pass/Fail.
- **MTR 105** 0 Clinical Music Skills Eval II
- Description: An evaluation of musical competence in which the student prepares 20 songs (5 children and 15 adult) on piano and guitar, and performs a selection of these in a jury. The student demonstrates a range of accompaniment styles on both piano and guitar, including folk, jazz, Latin and Blues. In addition, students transpose 4 and 5 chord songs at sight and provide an accompaniment to a notated melody that includes I, ii, IV, V, V7 and VI chords. Students must pass this evaluation in order to continue in music therapy practicum (MTR300). Pass/Fail.
- 0 **MTR 106** Clinical Music Skills Eval III
- Description: An evaluation of musical competence in which the student prepares 30 songs (5 children and 25 adult) on piano and quitar, and performs a selection of these in a jury. Students demonstrate a range of accompaniment styles on both piano and guitar, accomplished during level I and II evaluations, as well as Travis picking, pentatonic improvisations on piano, and 12-bar Blues in at least three keys, In addition, students transpose 4 and 5 chord songs at sight and provide an accompaniment to a notated melody that includes I, ii, IV, V, V7 and vi chords. Students must pass this evaluation in order to be eligible for MTR400 Music Therapy Internship. Pass/Fail.
- **MTR 107** 1 Intro to Clinical Music Skills
- Description: In this course, students will develop technical and therapeutic music skills in voice, piano, guitar, and percussion relevant to music therapy clinical practice, and focus on the link between musicianship and therapeutic engagement. Instruction on these skills will involve the ability to sing with and without accompaniment (piano, guitar, percussion) with accurate pitch and appropriate emotional expression. This course provides an opportunity for supported development of planned and spontaneous musical expression in order to lay the groundwork for music therapy repertoire development in individual lessons. Additionally, the class will focus on the therapeutic meaning of music to meet the various needs of different clients that students may encounter in clinical work.
- 3 **MTR 200** Music Therapy Foundations
- Description: Students survey the music therapy discipline and are oriented to professional issues. Areas addressed include defining music therapy, areas of practice, and multicultural considerations in clinical practice. Methods of music therapy are introduced theoretically and applied in an experiential format. Students receive bibliographical instruction and are introduced to music therapy research through music-centered self-inquiry. (Prerequisites: MTR 100, PSY 101)
- MTR 201 0 OR 3 Didactic Practices Mus Therapy
- Students are introduced to didactic practices in music therapy, in which music experiences and Description: therapeutic relationships promote the acquisition, restoration, or maintenance of cognitive abilities and skills integral to well-being. Clinical, and research literature pertaining to these practices are reviewed. The role of music experiences in client assessment and treatment is introduced in simulated didactic music therapy experiences. (Prerequisites: MTR 200, MUSC 391, MTR 103; Co-requisite: PSY 324)
- **MTR 202** 3 Medical Practices Mus Therapy
- Description: An examination of biopsychosocial medical practices in music therapy, in which music experiences and

Course Credit	ts Title
---------------	----------

therapeutic relationships promote physiological and emotional wellbeing. (Prerequisites: MTR 103, MTR 200, MTR 201, Co-requisite: BIOL 202)

#### MTR 203 0 OR 3 Psychiatric Pract Mus Therapy

Description: An examination of psychotherapeutic practices in music therapy, in which music experiences and therapeutic relationships promote mental and emotional wellbeing. (Prerequisites: MTR 103, MTR 200, MTR 201, MTR 202, MTR 300; Co-requisite: PSY 320)

#### MTR 204 1 Cultrl Responsvn&Mus Diversity

Description: We live in a diverse and multicultural society shaped by events of the past that influence the present moment, and music is a part of culture's formation and expression. Many of the populations that students in music therapy will work with have cultures that are different from one's own. The engagement of these individuals in an appropriate manner requires the acquisition of knowledge about the experiences that have shaped a culture and their experiences of discrimination and oppression. Classroom discussions and experiential activities will focus on how these factors influence our current understanding of implicit bias, discrimination, common factors that affect most marginalized groups, and group-specific issues in America, and develop skills in cultural humility and responsiveness. In addition, this course will explore how to apply this knowledge into the clinical music setting in order to reach competency in culturally responsive music therapy practice. Approaches that develop sens

## MTR 255 1 Technolgy for Music Therapy

Description: This course provides an overview of applications of music technology in the context of clinical music therapy. The fundamental language and concepts of audio technology (analog and digital) will be reviewed and the literature on technology in music therapy will be surveyed. Students will be introduced to computer-based music production and recording, including the basic uses of music sequencing, recording, editing, as well as the basics of MIDI technology including sound modules and controllers. Through creative projects students will explore the application of these technologies to help clients work towards physical and psychological goals.

#### MTR 256 1 Intro Verbal Skills Mus Thrpst

Description: This course will assist in the development of basic counseling skills to complement and enhance music therapy techniques in order to maximize therapeutic benefit for clients, and is designed to provide an introductory understanding of counseling and consultation processes for individuals and groups. This course will facilitate understanding of essential interviewing techniques to improve therapeutic relationships, demonstrate support, and facilitate growth. An understanding of the potential cultural and ethical considerations as related to verbal processing and music therapy skills is also emphasized. Students will participate in verbal discussion and dialogue, as well as live, interactive music experiences as a part of developing an understanding of concepts and techniques featured in the course. In addition, students will have opportunities to conduct simulated music therapy sessions involving class peers. Differentiation between the level of depth and insight work achievable at an u

#### MTR 300 1 TO 3 Music Therapy Practicum

- Description: A supervised clinical field training experience in various music therapy settings. Students have the opportunity to apply various principles, skills, and resources acquired through course work, as well as to develop new skills and resources. Students work under the supervision of both an on-site music therapist and university music therapy faculty. A weekly clinical training forum provides students with opportunities to share experiences, address problems and issues, and exchange peer support. Students document the practicum in a professional report (presented at the culmination of the semester), and record their personal experiences in self-inquiry logs. Each student must complete a minimum of three practicums (each featuring a different client population), at 1 credit each (3 credits total), for a minimum of 65-70 clinical training hours per semester (200 hours total). With permission of the department, students may complete more than one practicum within a given semester. (Prerequis
- MTR 301 1 Ethical Practice in Mus Thrpy
- Description: Students gain an understanding of ethical thinking in music therapy, focused on clinical practice,

Course Credits Title	
----------------------	--

supervision and research. Students develop a working knowledge of AMTA and CBMT ethics and competency guidelines, discuss case examples, and develop critical thinking skills. Students also develop an understanding of HIPAA, professional relationships, confidentiality, and the relationship between education, training, clinical competence, and ethical practice. (Prerequisite: MTR 200)

## MTR 345 2 Psychology of Music

Description: An overview of the physiological, neurological, psychological, developmental and social foundations of music. Students develop an understanding of auditory processing and music perception, music cognition, developmental foundations of music perception and learning, and disorders specifically related to music perception and processing. Research in the Psychology of Music will be surveyed and evaluated. (Co-requisite: PSY 101)

# MTR 400 1 TO 6 Music Therapy Internship

Description: An extended, intensive, clinical field training experience featuring one or more client population(s) and/or setting(s). Students continue to work under both on-site and academic supervision, and continue to participate in the weekly clinical training forum. Students document the internship through various reports and summaries, and continue to record their personal experiences in self-inquiry logs. Each student must complete a minimum of two semesters of internship (approximately six months in total, combined duration), at 2 credits each (4 credits total), and must accrue a minimum total of 1000 clinical training hours combined over all semesters elected). By special arrangement and with the permission of the department, internship may be completed on a part-time basis over three semesters (approximately one year in total, combined duration), at 2 credits each (6 credits total). Prerequisites: MTR 100, 200, 201, 202, 203, 300 (3 credits); all music therapy course grades at C or higher

## MTR 401 0 TO 6 Music Therapy Special Topics

Description: Individual reading, research, and presentation of a topic or development of a special project on an independent basis, under the direction of music therapy faculty. (Offered upon request.)

### MTR 406 2 Theoretic Orient MTR Clin Prac

- Description: Students prepare for professional life by developing a music therapy presentation, a resume, and practicing interview strategies. Students gain an understanding of the philosophical and theoretical underpinnings of music therapy clinical practice and integrate music therapy theories and practices through an examination of the clinical, theoretical, and research literature. This knowledge is applied by articulating and formally presenting their clinical orientation as it pertains to a particular population in a specific setting. Philosophies of therapy, human development, music and health are explored and connected to clinical practice with an emphasis on research. (Prerequisites MTR 203, MTR 300)
- MTR 408 3 Song Writing in Music Therapy
- Description: An in-depth orientation to using songs in music therapy clinical practice. Students develop a theoretical, methodological and practical understanding of song writing, along with various forms of lyric substitution. (Prerequisite: MTR 200) Elective course offered as needed.

MTR 410 3	Songs in Thrpy:Repertoire Dev
-----------	-------------------------------

Description: Students survey the popular music literature and develop song repertoire in various genres, specifically focusing on children's music, spirituals, classic rock, folk, and popular music from the 1980s onwards. Sociocultural and developmental factors are discussed. (Prerequisite: MTR 200) Elective course offered as needed

MTR 415	1	Music Therapy Research
---------	---	------------------------

Description: Students develop an understanding of research in music therapy, including the various methods that characterize qualitative and quantitative approaches to research. Students gain skills in research literature search tools, methods, and APA style, and in so doing, develop an understanding of reading, analyzing, and writing research. Students apply theoretical concepts by conducting practical experiments on their peers in both quantitative and mixed methods approaches, and prepare posters

MUSC 090	0	Music Convocation
Description:	recitals, quest recitals, musi	s once throughout the semester. It provides for experience of student c seminars and exchange. It also allows for similar experiences at other on- nts. Pass/Fail (Offered fall and spring semesters.)
MUSC 101	3	Music Appreciation
Description:	This course is designed to as	ssist students in the understanding and appreciation of a wide variety of

Course	Credits Title
	musical styles which include classical and popular music. Open to all students. (Offered every fall.)
MUSC 102	3 World Music
Description:	This cross-cultural course explores the diverse array of global music which represent the mainstream as well as the perimeter of the world's musical languages. Varied media, Internet, and live performances will be included. Open to students of all disciplines. (Offered every spring.)
MUSC 105	1 Voice Class
Description:	Introduction to principles of correct vocal production through voice building and song literature. Required of all music students except those whose major performance area is voice. (Offered every spring)
MUSC 106	1 Diction Class
Description:	Group instruction on the correct pronunciation and enunciation for singing classical music repertoire in the most commonly used global and native languages. These languages include French, Italian, German, and English. Required of all music students whose major performance area is voice. (Offered every spring)
MUSC 107	1 Brass Methods
Description:	Overview of teaching procedures for beginning class instruction. Methods and techniques for learning basic performing skills on various brass instruments with applications for music teaching and learning theory. (Offered every fall)
MUSC 108	1 Percussion Methods
Description:	Overview of teaching procedures for beginning class instruction. Methods and techniques for learning basic performing skills on various percussion instruments with applications for music teaching and learning theory. Required for Music Education and Music Therapy majors. (Offered every spring.)
MUSC 117	1 Guitar Class
Description:	This course is designed to provide students with a functional and practical knowledge of fundamental guitar skills. These skills include basic techniques for chording, strumming, accompanying, picking, and reading guitar ligatures. This course is one opportunity for Music Education majors to prepare for passing the guitar proficiency exam (GPE) required by PDE. (Offered every fall)
MUSC 118	1 Music Fundamentals
Description:	A thorough presentation of music essentials (assessment levels given by instructor): note-reading in all clefs, rhythmic development and usage, major/minor scale construction, intervals and inversions, basic triad construction and usage. Introduction to aural, vocal and written skills. (Co-requisites: MUSC 130, MUSC 131) (Offered every fall.)
MUSC 130	3 Music Theory I
Description:	Course includes a thorough but concise review of music fundamentals: elements of pitch and rhythm, scale patterns, intervals and inversions. Primary course work includes: structure of triads and sevenths chords, diatonic triads in major and minor keys, principles of voice-leading, examining the melodic line, part-writing with root position chords, principles of harmonic progression, use of sequential devices, and introduction to musical form. (Co-requisite: MUSC 131). (Offered every fall.)
MUSC 131	1 Aural Skills I
Description:	Classroom and computer-assisted ear-training will include basic melodic, rhythmic, and harmonic dictation. Sight-singing will focus on diatonic major melodies based on scalar patterns and on tonic, subdominant, dominant, supertonic, and leading-tone triads. The three forms of the minor scales will be introduced (Co-requisite: MUSC 130). (Offered every fall.)

Course	Credits	Title
MUSC 132	3	Music Theory II
Description:	patterns; part-writing with in musical forms through analys the harmonic /melodic textur	monic progressions with attention to root movement and sequential versions of triads and 7th chords; the study and identification of basic sis and composition; identification and use of non-chord tones as found in re of music; use of extended 7th chords in introduction to chromaticism, armonic functions. (Co-requisite: MUSC 133) (Offered every spring)
MUSC 133	1	Aural Skills II
Description:	subdivisions, and patterns de	sisted ear-training will include increased melody length, varied meters, beat rived from secondary harmony. Sight-singing will emphasize both major asional chromaticism. Students will sing short chorale passages in four parts ffered every spring)
MUSC 134	1	Piano Lab for Non-Music Majors
Description:	playing the keyboard, unders	major with emphasis on how to read music, coordinating two hands in standing melodies, playing chords for popular music and learning how e piano as a percussion instrument. No Prerequisites. Course may be esters)

Description:	Study of 18th century polyp (Prerequisites: MUSC 232 a	honic style. Development of skill in writing two-and three-part counterpoint. nd MUSC 233). (Offered every fall.)
MUSC 242	2	Composition
Description:	Application of compositiona (Offered even spring semes	l techniques in the writing of small musical works for voices and instruments. sters.)
MUSC 300	3	HON: Women in Performing Arts
Description:	composers, and performers	the acceptance and recognition of outstanding women musicians, from Biblical times through the present. Students will be encouraged to personal interests and academic curricula.
MUSC 306	2	Orchestration
Description:	scoring for the entire orche capabilities is developed. S	nusical compositions for string, woodwind and brass ensembles will lead to stra. A more focused knowledge of instrumental ranges timbres and kill in instrumental transposition is reinforced and knowledge of effective red for success in transferring idiomatic musical figurations. (Prerequisites: (Offered every spring.)
MUSC 307	1	Vocal Pedagogy

Description: This course will cover the various learning strategies for teaching private and group voice lessons.

Course	Credits	Title

Course will address how to teach performance skills and techniques to voice performance majors and will include advanced diction training in the primary vocal languages. (Prerequisite: MUSC 106) (Offered even fall semesters.)

- MUSC 308 1 Instrumental Pedagogy
- Description: This course will cover the various learning strategies for teaching private and group instrumental lessons. Course will address how to teach performance skills and techniques to orchestral, band, and keyboard musicians as part of a private instrumental studio. (Offered odd spring semesters.)
- MUSC 313 1 Prof Orient in Music Education
- Description: Introduction to the methodologies, standards, and current issues of the music education profession. Course is taught in conjunction with directed observations in diverse music education settings. Fulfills EDU 310 requirement for Music Education majors (Offered every fall.)
- MUSC 314 3 Music in the Elementary School
- Description: Principles, practices, and materials of classroom music education in levels kindergarten through six. Introduction to the Kodály, Orff, Dalcroze, and Gordon methods. Emphasis on voice as the primary instrument. (Offered every spring.)
- MUSC 315 2 Music in the Secondary School
- Description: Principles, practices, and materials of music education at the secondary level. Emphasis on music learning theory and curriculum development. (Offered every fall.)
- MUSC 317 2 Basic Conducting
- Description: An introduction to the fundamental techniques for conducting instrumental and choral ensembles. Topics will include learning basic conducting patterns, use of the left hand, and fundamental technical/musical development with a baton. (Offered every fall.)
- MUSC 321 2 Advanced Conducting
- Description: This course will be an advanced application of basic techniques for conducting choral and instrumental music. Topics will include score study, rehearsal planning, rehearsal techniques, examples of repertoire, and interpretation of various musical styles as well as an opportunity to rehearse and conduct a large vocal and instrumental ensemble. (Prerequisite MUSC 317) (Offered every spring.)
- MUSC 332 0 TO 2 Senior Recital
- Description: Recital in the major performance area during the senior year. With permission of applied instructor, a full recital of 60 minutes can be taken for 2 credits. A recital of 30 minutes or a joint recital of 30 minutes each can be taken for 0 or 1 credit. (Offered fall and spring semesters.)

# MUSC 333 0 Piano Proficiency

- Description: All music majors must pass a Piano Proficiency Exam before graduation. This exam may be taken in sections or completed in a single session. The exam is typically pursued in the junior year and completed by the first semester senior year. MUSC 135, 136, 235, 236 assist with preparation for this exam. Pass/Fail. (Offered fall and spring semesters)
- MUSC 334 0 Guitar Proficiency
- Description: The Guitar Proficiency Exam is in response to the Pennsylvania Department of Education (PDE) requirement that all music certification candidates demonstrate functional performance skills in acoustic

Course	Credits	Title

	guitar. All music education majors must pass this exam, preferably prior to student teaching. MUSC 117 Guitar Class assists with preparation for this exam. Pass/Fail. (Offered fall and spring semesters)
MUSC 341	3 WI:Music Hist I: Bach & Before
Description:	Survey of Western music including Medieval, Renaissance, and Baroque periods. Representative works will be studied, analyzed, and performed. (Prerequisites: MUSC 132 and MUSC 133) (Offered every spring)
MUSC 342	3 WI:Mus Hst II:Classic&Romantic
Description:	Survey of Western music from Haydn and Mozart through Liszt and Wagner. Representative works will be studied, analyzed, and performed. (Prerequisites: MUSC 132 and MUSC 133) (Offered every fall)
MUSC 344	2 WI: Seminar in Music
Description:	In-depth study of research for application to music therapy, music education, or other related fields. Emphasis on linkage of musicological styles through the creative process: ethics in research practices for music will be examined. (Prerequisite: MUSC 341, 342, and 441 or with permission of the instructor). (Offered every spring.)
MUSC 391	3 Music for Exceptional Learners
Description:	Techniques, methods, and materials used in teaching music to exceptional learners with a wide range of individual needs, especially as encountered in the inclusive classroom setting. This course develops skill and knowledge relevant to both music education and music therapy. Fulfills EDU 381 requirement for Music Education majors. (Offered every fall)
MUSC 404	1 Semester Peformance
Description:	This course will allow the student in the performance emphasis to have additional opportunities to be coached in performance and to perform in public. The course will help prepare the student for his/her culminating and required performance experience: Senior Recital. This course must be repeated for 6 semesters, beginning the sophomore year. (Offered fall and spring semesters)
MUSC 441	3 WI: Mus Hst III: 20th C Style
Description:	Survey of Western music beginning with Post-Romanticism and continuing through present day. Includes both classical and vernacular genres. (Prerequisites: MUSC 132 and MUSC 133) (Offered every spring)
NSLS 101	1 NSLS: Foundatns of Leadership
Description:	Covers the induction process, basic leadership skills, basic networking skills, and a carousel of speaker engagements.
NSLS 102	1 NSLS: Advanced Leadership
Description:	This Advanced Leadership program is designed to help you integrate your leadership development into your lifestyle. The combination of on-campus and online learning modules delivers a broader understanding of core leadership education and a hands-on, cross-disciplinary approach to leadership. Whether on campus or in our online cohorts, members have the opportunity to apply these new skills or understandings to everyday life and contribute more effectively to other projects and initiatives.
NSLS 103	1 NSLS: Executive Leadership
Description:	The Executive Leadership course is a personalized learning experience offered by The National Society of Leadership and Success (NSLS) that puts members on the forefront of innovative leadership development. Unlike other leadership development programs, NSLS takes members beyond a narrow

Course	Credits	Title

focus of goalsetting to impacting and leading others. In our tailored programs, our coursework prepares leaders to understand and engage with contemporary issues of leadership: collaboration, creative problem-solving, communication, and personal and social action. Working on-campus or online, our programs are built around five leadership modules and prepare members to lead in the 21st century and drive meaningful change for themselves, others, and the world.

- NUR 200 3 Nursing Concepts
- Description: Introduction to the profession of nursing from a historical and theoretical perspective. The roles of the baccalaureate generalist nurse within today's health care system are presented. (Prerequisites: CHE 100; BIOL 209 and 210; co-requisite: BIOL 208. Special permission by the nursing division to take one other science course concurrently is required.)
- NUR 202 0 OR 5 Fund of Holistic Nursing Pract
- Description: Emphasis on foundational nursing concepts and skills necessary for practicing holistic nursing care. Three credits of lecture; two credit hours are experiential learning in the nursing simulation laboratory (1 credit (average of 2 hours per week) and in a long-term care facility (1 credit (average of 3 hours per week). (Prerequisite: NUR 200 and MATH 110; co-requisites: BIOL 205 and NUR 307. Special permission by the nursing division to take one other science course concurrently is required.)

NUR 210 3 Philosophy of Hardiness

- NUR 300 1 TO 4 Special Topics in Nursing
- Description: As the Affordable Care Act (ACA) highlights specific topics relevant to the delivery of safe quality patient care in a changing health care environment, the special topics in professional and holistic nursing course is offered as needed.
- NUR 304 3 Pharmacology
- Description: An overview of pharmacotherapeutic principles and the basics of pharmacokinetics and pharmacodynamics are presented. Students develop the necessary knowledge base and skills for safety in medication administration. The effects of drugs on different age groups and the nurse's responsibilities in drug therapy are explored. Legal and ethical issues will be examined. (Prerequisites: All 100 & 200 level science courses and NUR 200, 202 & 307; co-requisites NUR 307 and 308)
- NUR 307 0 OR 4 Holistic Health Assessment
- Description: Introduction to the concepts of holistic health assessment of clients across the lifespan. Students develop assessment skills for the collection of subjective and objective data. Concepts, models and theories of health promotion, disease and injury prevention will be introduced. One credit is experiential learning in the nursing simulation laboratory. (Prerequisites: All required 100 and 200 level science courses, NUR 200; co-requisite: NUR 202) 3 credits of lecture, 1 credit (average of 2 hours per week) of simulation laboratory.

## NUR 308 0 OR 5 Holistic Nursing Care I

- Description: Introduction to concepts and principles associated with alterations in holistic integrity in the adult. Students will care for adults with selected acute health problems. Two credit hours are experiential learning in a variety of healthcare settings. (Prerequisites: All required 100 and 200 level science courses, NUR 200 and 202; co-requisite: NUR 304) 3 credits of lecture, 2 credits (average of 6 hours per week) of clinical practice.
- NUR 311 0 OR 5 Holistic Nursing Care II
- Description: Emphasis on concepts and principles of psychiatric/mental health nursing for clients across the lifespan. Two credit hours are experiential learning in a variety of healthcare settings. (Prerequisites: All required 100 and 200 level science courses, all required 200 level nursing courses, NUR 304, 308, and PSY324;

Course	Credits	Title

co-requisite: NUR 314) 3 credits of lecture, 2 credits (average of 6 hours per week) of clinical practice

NUR 312

- 6 Profess & Holistic Nurs Pract
- Description: The course explores nursing as a profession examining its history, trends, and current role in the health care system. Critical reflective thinking as a basis for professional nursing is explored. The RN student using critical thinking skills identifies and examines concepts related to holism and holistic nursing theory. The application of this theory to self-care and nursing practice is emphasized. (Prerequisite or co-requisite: ENG 241)
- NUR 314 0 OR 5 Holistic Nurs Care Chldbr Fmly
- Description: Introduction to the concepts and principles of nursing care of the childbearing and childrearing family. Issues in women's health, concepts of growth and development, and family-centered care will be emphasized. Three credit hours will be didactic with two credit hours of experiential learning in a variety of healthcare settings. (Prerequisites: All required 100 and 200 level science courses, NUR 304, 308, and PSY 324; co-requisite: NUR 311) 3 credits of lecture, 2 credits (average of 6 hours per week) of clinical practice.
- **NUR 333** 3 Pathophysiology
- Description: This course will introduce students to pathophysiology and disruptions in normal body functioning in individuals across their lifespan. Objective and subjective manifestations of common health problems resulting from environmental, genetic, and stress-related maladaptation are assessed and analyzed. Assessment findings, diagnostic testing, and interventions for specific health problems are discussed. (Prerequisites: BIOL 208, 209, 210)

#### NUR 336 3 Anthropology and Health

- Description: This course introduces anthropological theories, concepts, and methods used to examine health beliefs and practices of a variety of cultural groups in the United States and throughout the world. The course is designed to provide the practicing nurse with tools for effective delivery of health care to clients from different cultures. (Elective)
- NUR 350 6 Holistic Health Assessment
- Description: This course builds on the RN students' prior knowledge and clinical experiences, and further develops comprehensive health history interviewing and physical examination assessment skills. The principles of health promotion and illness prevention are applied in the analysis of physical findings and health behaviors of the adult patient. Anthropological theories, concepts, and methods are introduced to provide the practicing nurse with transcultural tools to work with multicultural teams and skills needed to perform a comprehensive cultural assessment in order to deliver culturally competent nursing care to clients from various cultural groups. Laboratory practice of health assessment skills is included, as well as experiential learning. (Prerequisite: NUR 312)

#### **NUR 370** 5 Nursing Research

- Description: The fundamentals of nursing research are introduced and developed through the critical reading of research studies and their application of evidence-based nursing practice. Students develop skills in the identification, interpretation, and use of research findings in its application to evidence-based practice. (Prerequisite: NUR 312; Pre or co-requisite: ORBH 325)
- **NUR 404** 3 WI: Nursing Research
- Description: The fundamentals of nursing research are introduced and developed through the critical reading of research studies and their application to nursing practice. Students develop skills in the identification, interpretation, and use of research findings, and their application to evidence based practice. (Prerequisites: All required 100 and 200 level science courses, all required 200 and all 300 level nursing courses, NUR 405, and NUR 410; Pre-or co-requisite: PSY 208; Co-requisite: NUR 408, and NUR 435)

Course	Credits	Title
NUR 405	0 OR 6	Holistic Nursing Care III
Description:	alterations in holistic integrity settings. (Prerequisites: All p	tudent's knowledge and skills to care for adult clients experiencing complex 7. Three credit hours are experiential learning in a variety of healthcare rior 300 level nursing courses; co-requisite: NUR 410) 3 credits of lecture, a per week) of clinical practice.
NUR 408	0 OR 5	Concepts of Public Health Nurs
Description:	emphasized. Two credits are settings. (Prerequisites: All re level nursing courses, NUR 4	licable to public health and aggregate care. Community assessment is experiential learning applying course concepts in a variety of community equired 100 and 200 level science courses, all required 200 and all 300 05, and NUR 410; co-requisite: NUR 404 and NUR 435) 3 credits of lecture, per week) of clinical practice.
NUR 410	3	Concepts Nursing Ldrshp & Mgmt
Description:	and discussed. Health care poissues, motivational and char	dership and management in health care environments will be examined olicy, organizational mission and vision, strategic planning, legal/ethical nge theories are applied to health care systems. (Prerequisites: All required urses, all required 200 and 300 level nursing courses; co-requisite: NUR
NUR 418	3	Holistic Health
Description:		lent's knowledge and practice in holistic nursing. The student analyzes and arch findings of integrative and alternative modalities to nursing care.
NUR 426	6	Leadership in Nursing
Description:	and discussed. Health care p	idership and management in health care environments will be examined olicy, organizational mission, vision and strategic planning, legal/ethical , motivational and change theory are applied to health care systems.
NUR 434	6	Holistic Care Chronically Ill
Description:	nursing. The RN student appl alternative modalities to nurs theories presented and to de related to aging, role change	312 and expands the RN student's knowledge and practice in holistic ies and analyzes evidence-based research findings on integrative and sing practice. The RN students are guided to build on knowledge and holistic velop a holistic framework of care for the chronically ill and elders. Issues s, vulnerability, stigma, ethics, advocacy, end of life care, and case he chronically ill are addressed. (Prerequisite: NUR 312)
NUR 435	0 OR 5	Prep for Professional Practice
Description:	and independent clinical expe 200 and 300 level nursing co	professional nurse. The course emphasizes preparation for NCLEX-RN® erience. (Prerequisites: All 100 and 200 level science courses; all required urses, NUR 405, NUR 410, and THE 408; co-requisite: NUR 404 and NUR redits (average of 9 hours per week) of clinical practice.
NUR 450	2	Capstone
Description:		n of the BSN program. In a capstone paper, students reflect on their nthesis of knowledge and attainment of the BSN program's learning prior nursing courses)
NUR 451	6	Capstone in Public Health Nurs
Description:	care and investigate the factor	ots and implications of community-oriented and community-based nursing ors that impact public health. Health problems and issues facing vulnerable oles of the nurse in promoting community and public health are explored.

Course	Credits	Title
	programs. The structure of h	ved through service learning, community assessment, and health promotion nealth organizations and the impact of this structure on national and global red. GUIDED FIELD EXPERIENCE REQUIRED (Prerequisite: All prior nursing
NUR 452	3	Environmental Health
Description:	explores the physiologic and	related to the health effects of environmental influences. The course developmental effects of exposure to physical hazards and biochemical nealth care professionals in reducing potentially harmful exposures.
NUR 495	0	NCLEX Review Course
ORBH 303	3	Organizational Concepts
Description:	organization based upon a s	I and informal functions of organizations and analyze an agency or ystems model. Students also explore and solve organizational problems I. This analysis will be applied to students' research throughout the vork-related.
ORBH 307	3	Adult Develop & Life Assess
Description:		oment theory, linking these concepts to life through a process of individual temporary adult development theories are examined to provide the nd life assessment.
ORBH 312	3	Intro to Applied Research
Description:	soundly presented literature analyzing prior literature, an on utilization of the America	ints to the research design process and helps them write a well-structured, review. The course will assist students in selecting a topic, researching and d finally writing the literature review. In addition, emphasis will be placed in Psychological Association (APA) style. The course includes library campus resources, and an introduction to the writing center. (Pre/co-
ORBH 315	3	Capstone Proposal Design
Description:	requirements of their capsto presented thesis statement a American Psychological Asso	oduction to research and its tools designed to support students in meeting ne proposal. This course helps them write a well-structured, soundly and conduct a literature review. Emphasis will be placed on utilization of the ociation (APA) style. The course includes library orientation, investigation of of the writing center. (Prerequisite: ENG 242)
ORBH 320	3	Rsrch & Analysis Using Stats
Description:	research with a focus on bus print and electronic sources,	nts to the theoretical principles and practical applications of academic siness. Students learn to form initial inquiry questions, locate and evaluate and summarize, paraphrase, and incorporate source material in written citation format. (Pre/co-requisite: ORBH 312)
ORBH 325	3	Rsrch&Anlysis Using Statistics
Description:	research design, descriptive	roduction to the research design process and its tools. Content includes and inferential statistics using Google Sheetz. Students are given the rch studies and discuss managerial decision-making.

Course	Credits	Title
ORBH 350	3	Psychometrics: Employee Select
Description:		ological testing in employee selection, placement, and career development ific instruments as well as interviewing skills. The impact of legal and ethical s will be discussed.
ORBH 352	3	Performance Assessment
Description:	Presentation of motivational practices in business and industry as well as current performance appraisal theories and practices. Contemporary theories of motivation are discussed including need, cognitive and reinforcement theories. Effects of job enrichment, goal setting, incentive systems, and worker participation are examined.	
ORBH 354	3	Performance Develop & Training
Description:		g and development in today's business environment including: learning earning objectives, instructional techniques, and evaluation of training
ORBH 356	3	Managing Employee Stress
Description:	Examines the identification and management of stress factors which can impact employee health and productivity including: interpersonal relationships, time management, family crises, addiction issues, and the role of employee assistance programs.	
ORBH 358	3	Conflict Resolut & Negotiation
Description:	Presents the diagnostic questions needed to understand a conflict and explores strategies available to manage the situation. Personal conflict management style will be identified and interpreted. Techniques for negotiation and mediation will be discussed.	
ORBH 360	3	Personnel Mgmt & Development
Description:	Examination of relationships and issues in personnel administration and human resource development within the context of local, state, and federal government as well as private organizations' emergency management sectors. Topics covered include: personnel management, organizational development productivity, recruitment and selection, performance management systems, discipline, conflict negotiation/resolution and collective bargaining. (Course offered for Emergency Planning and Management majors.)	
ORBH 390	3	Research Methodology
Description:	This course assists students in formulating a research problem statement, identifying its hypothesis, proposing a research design and formulating proposed intervention and analysis. Provides students the opportunity to conduct a professional presentation on their own research topics. (Pre/co-requisite: ORBH 320)	
ORBH 395	3	Capstone Synthesis&Presentatn
Description:	The culmination of the capstone proposal sequence, this course assists students in identifying hypothesis, proposing research design, and formulating analysis and proposed intervention. The course requires students to complete the capstone proposal and conduct a professional presentation on their topic. The completed capstone proposal will be suitable to share with a potential employer or include within a post-graduate application. (Prerequisite: ORBH 315; Co-requisite: ORBH 325)

	categorical and modern symbolic	logic.
PHI 324	3 Phil	osophy of Literature
Description:	literature, students will discover the	literature. While reading and analyzing traditional and popular ne relationship between literature and philosophy. Special emphasis e wherein students will discover recurring philosophical themes.
PHI 326	3 Wor	nen Thinkers
Description:	Interdisciplinary methods are used in order to examine philosophical issues connected to women, gender, and knowledge. Students will be introduced to the classic texts in feminist thought and continue the analysis of the role of gender in the construction of various academic and theoretical frameworks, including literature, science and epistemology, psychoanalysis, and social theory. In addition, students will read the work of women thinkers who have influenced the development of philosophy without emphasizing gender as a basic mode of interpretation.	
PHI 328	3 Arti	ficial Intelligence
Description:	intelligence (AI), allowing them to mind/body problem, personal iden	eral introduction to philosophy of mind and its implications for artificial explore topics ranging from the nature of consciousness, the ntity, intelligent and complex adaptive systems, to robotics and related zes a historical, thematic, and multi-media approach which extends to biology and neuroscience.
PHI 329	3 Con	temporary Philosophy
Description:	A developmental approach to contemporary Continental philosophy in the 19th and 20th centuries; the historical and contextual nature of reason, knowledge, meaning, and existence will emerge in conversation with major phenomenological thinkers such as Kant, Hegel, Heidegger, etc. Attention will also be given to philosophers who critically analyze the roles of social/political institutions and power dynamics. Course involves reading complex material, research, and reflection.	
PHI 330	3 Phil	osophical Anthropology
Description:	Through reading, discussion, and	ies dealing with the origin, nature, and destiny of human beings. application of theories to contemporary problems facing the person a coherent theory that describes a human being and his/her community.
PHI 331	3 Phil	osophies of Middle East
Description:	Study of ancient, medieval, and contemporary philosophy of religion associated with Near and Middle East, including Jewish, Christian, Gnostic, Medieval, and Muslim currents of thought and practice. While each tradition will be considered in its own context, students are encouraged to understand each in relation to the others in order to gain a more comprehensive view. This is accomplished through reading primary and secondary materials while engaging in critical reflection and dialogue within and among the traditions.	
PHI 333	3 Fait	n and Reason
Description:	et Ratio). The Pope affirms that "p person" and in this encyclical, he	g and significance of John Paul II's encyclical Faith and Reason (Fides philosophy is a form of human adventure that lies open to every reconciles the intellectual inquiry for truth with the Gospel of Christ. Inted by the use of faith and reason. (See THE 333)
PHI 334	3 HON	I:Reason & Reality -Questing
Description:	hand the tradition of Catholic phile	course in philosophy and theology wherein students experience first- osophy which appreciates the power of faith but must rely on the eking earnestly for truth has been a driving force in philosophy.

Course	Credits	Title
--------	---------	-------

Historically, Catholic philosophers have recognized the compatibility of reason and faith in their quest for truth. In this course, students will embark on a personal philosophical quest as they read classic, primary texts of Catholic philosophers; write philosophical journal entries; engage in philosophical discourse; and collaborate with fellow "questers" in presenting a research paper that blends reason and reality. (See THE 334 HON)

### PHI 335 3 HON: Global Studies

Description: Theories of globalization. As the peoples of the world become more interdependent in terms of technology, economics, and cross-cultural exchange, various issues arise. Students will investigate major views of globalization and its critics while examining how the process of globalization occurs in the context of one particular non-Western city.

## PHI 336 3 Ancient Philosophy

Description: Ancient Greece boasted great prosperity, especially in terms of intellectual genius. In this course, students will meet the early Greek thinkers who set philosophy in motion. First, "fragments" or excerpts from the Pre-Socratics will be studied. Then, we will concentrate on understanding the central ideas of Socrates, Plato, and Aristotle. Through reading primary sources, students will acquire a familiarity with ancient philosophers, their methods, and their thought. An understanding of these ancient thinkers' philosophies will provide a sturdy foundation for future courses in philosophy as well as enrichment for a daily search for wisdom.

# PHI 337 3 Medieval Philosophy

Description: A study of medieval thought with the dominant theme of faith seeking understanding enhances any study of the humanities. This course will emphasize Augustine's Christian and Neo-Platonic synthesis and the theologian-philosophers of the twelfth and fourteenth centuries. We will explore the metaphysics of creation and how it impacts the notions of being, essence, and existence. The readings will focus on selections from St. Augustine, St. Anselm, St. Thomas Aquinas, Maimonides, Giles of Rome, and Henry of Ghent.

### PHI 338 3 Philosophy and Film

Description: Engagement of fundamental questions combines with the fundamentals of the film medium. We will explore the nature, interpretation, and value of film. We will also consider, through our experience of different genres, styles, and techniques, how film enhances and/or alters our view of life.

# PHI 339 3 HON:God,Darwin,Einstn&Big Bang

Description: The course studies the history of science and cosmology and the impact of these knowledge domains on metaphysics and the philosophy of religion. The course invites students to explore how evolving models of nature and the universe challenge us to consider our philosophical and theological views on the nature of reality. We will gain a very general understanding of major developments in biological and physical sciences and examine their implications for human life and thought through reading a variety of ancient, medieval, and contemporary philosophers and theologians.

## PHI 340 3 HON: Aesthetics

Description: Aesthetics is the branch of philosophy that examines the nature of art, the character of our experience of art and of the natural environment, and how these experiences shape out attitudes and spirit. Aesthetics seeks to know how the sensory experiences of les beaux arts (painting, poetry, sculpture, music, dance, performance, literature, film, photography, architecture, mass/popular art, etc.) and their attendant feelings inspire an apppreciation (or disapproval) within us. The cental issue of aesthetics has historically been the the definition of "art" and "beauty;" thus aesthetics walks a tightrope between relative/universal, subjective/objective, and cultural criteria. In this seminar course, students will enter into the philosophical fray as they read and discuss classical and contemporary sources regarding the nature of art. They will experience various forms of art and natural beauty present in our local area and reflect, through journaling, on their interaction with these art f

## SPAN 312 3 Spanish for Heritage Speakers

- Description: This course is designed specifically for native or heritage speakers of Spanish with oral proficiency but little or no formal training in the language. Generally, these are learners who were raised in homes where Spanish was spoken. The course is designed to build on the language base students already possess. Spanish-speaking students are not viewed as using an "improper" form of Spanish that is incorrect or needs to be eliminated. Rather, their language is viewed as an extremely valid means of oral communication. The primary purpose of the course is to develop reading and writing skills, although all of four language skills (listening, speaking, reading, and writing) are emphasized via cultural and community activities.
- SPAN 313 3 Hispanic Cultures Through Film

THE 340	3	Theological Wisdom
Description:	that have profoundly influen	of classic texts (ancient, medieval, modern) within the Christian tradition ced the ways Christians understand and relate to God. Texts include works ers, Augustine, Aquinas, Bonaventure, Luther, and others.
THE 341	3	HON: Love IN the Economy?
Description:	In the wake of the 2007 subprime mortgage crisis, which led to a worldwide recession, many people called for reform of our existing economic structures and institutions. Pope Benedict XVI proposed a radically different path: we need to put love in the economy so that it serves love and expresses love. His revolutionary proposal challenges commonplace thinking about love (e.g., that it is a virtue for private life) and the economy (e.g., that it works best when it serves self-interest). It also challenges theories of economic justice, both secular and religious, that stress the primacy of rights. Hailed by leaders around the world as a critical contribution to a global conversation about our shared destiny, this teaching invites careful thought and creative action on the part of all of us. This course seeks to engage students in this call to action. Can we help create an economy of love? Prerequisites: Foundational Theology Course: THE 109, 110, 209, 221 or 222.	
THE 342	3	Moral Wisdom
Description:	traditions that have profound	ancient, medieval, modern) within the Western philosophical and theological Ily influenced the ways we think about and pursue the good life. Texts ristotle, Augustine, Aquinas, Kant, and others.
THE 381	3	Foundations Spiritual Freedom
